

YOUR PRODUCT PACKAGE

Nexus

Enterprise Intelligence Layer Hero

An enterprise AI homepage where a full uncut neural lattice film meets a Sense→Route→Compound path rail and a sequential letter-melt headline - free, ready for your AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/nexus-neural-v1.mp4>

Offline file name if you were given a file: nexus-neural-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Nexus design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/nexus-neural-v1.mp4>

File name: nexus-neural-v1.mp4

What the film shows: a continuous dark neural lattice / constellation field, cyan and magenta light along node connections, deep void, uncut motion. About 59 seconds, silent, loops.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file nexus-neural-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport enterprise AI website HERO for an intelligence platform called NEXUS AI.

BACKGROUND VIDEO (required - FREE-PLAYING FULL FILM, never scroll scrub, never cut):

Use this video as the full-screen background film:

<https://www.ClickMotion.dev/assets/videos/nexus-neural-v1.mp4>

If the user has a local file named nexus-neural-v1.mp4, use that path instead of downloading.

The video is silent. It plays the COMPLETE neural lattice run uncut with autoPlay muted loop playsInline.

object-fit cover, object-position about 58% center. Scale about 1.015.

Do NOT map scroll to video.currentTime. Do NOT trim the film. The full duration is the product.

Soft deep-ink edge veils - keep the lattice readable. Soft vignette.

LOOK AND FEEL - ENTERPRISE INTELLIGENCE (not liquid-glass kitsch):

Stage ink #07080F under the film edges. Cool type #E8F0FF / #F2F6FF. Cyan #00D4FF. Magenta #FF006E.

Display: Space Grotesk (or similar geometric sans). Utility: Inter.

Quiet institutional density. Anthropic/OpenAI launch restraint. No purple mesh SaaS. No Motionsites pill docks. No Three.js particle spam as the signature.

SIGNATURE A - DECISION PATH RAIL (desktop, left):

Label "Path". Vertical line cyan to magenta. Three nodes:

01 Sense - Signals enter clean

02 Route - Policy owns the path

03 Compound - Outcomes accumulate

A small light pulse travels down the line ON TOP of the nodes (centered). Between nodes the ball is small; on each hit it grows and the node fills/brightens. Last node magenta-tinted.

SIGNATURE B - LETTER-MELT HEADLINE:

H1 line 1: Intelligence.

H1 line 2: That [rotating word].

Prefix "That " is static. The period is PART of each dynamic word (compounds. decides. scales. routes. multiplies.).

Split the dynamic word into individual letter spans. Each letter fades opacity and Gaussian-blurs independently with RANDOM delays (not left-to-right wave, not whole-word at once).

STRICT sequence: outgoing letters must fully finish melting out before the next word starts melting in. Hold fully sharp about 3 seconds.

Slow and elegant.

LAYOUT:

Top nav: brand NEXUS + small AI, center links Platform Models Safety Research, right Docs + primary CTA "Begin with Nexus".

Kicker: NX / 01 + Intelligence layer for production systems.

Lead: One stack for models, agents, and evaluation - built for teams that put AI on the critical path, not the slide deck.

Secondary link: Read the architecture →

Bottom system tape: LIVE pulse + GRAPH LIVE · NODES 14.2k · ROUTES 48 · EVAL CONT. · REGION GLOBAL

Optional wide desktop: floating "Active graph · Inference lattice · multi-region" plate in the film field.

FORBIDDEN:

Scroll-scrubbing the video. Cutting the video. Scaffold notes in the UI.

Purple mesh, emoji, rainbow gradient headlines, liquid-glass card stacks as the hero signature, Motionsites pill docks.

Cursor prompt (continued)

TECHNICAL:

React + TypeScript. Framer Motion for entrance. GSAP for per-letter melt (independent random delays).

Video: muted, loop, autoPlay, playsInline, full uncut duration.

Single default-export component NexusAiHero. Props: brand, backgroundSrc, posterSrc.

prefers-reduced-motion: static fallback, first cycle word only, no required autoplay.

QUALITY BAR:

Serious enterprise AI product film - calm, complete, uncut. Path pulse + letter melt are the signatures.

When done: I should see the full Nexus experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium full-viewport enterprise AI website HERO for an intelligence platform called NEXUS AI.

Your Smart AI Agent prompt (continued)

Purple mesh, emoji, rainbow gradient headlines, liquid-glass card stacks as the hero signature, Motionsites pill docks.

TECHNICAL:

React + TypeScript. Framer Motion for entrance. GSAP for per-letter melt (independent random delays).

Video: muted, loop, autoPlay, playsInline, full uncut duration.

Single default-export component NexusAiHero. Props: brand, backgroundSrc, posterSrc.

prefers-reduced-motion: static fallback, first cycle word only, no required autoplay.

QUALITY BAR:

Serious enterprise AI product film - calm, complete, uncut. Path pulse + letter melt are the signatures.

When done: I should see the full Nexus experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name NEXUS to [YOUR BRAND] everywhere, including the top left wordmark and AI label."

Change the headline

Ask your AI: "Change Intelligence. to [YOUR LINE 1]. Keep That [verb]. as line 2 with the letter-melt cycle."

Change the rotating words

Ask your AI: "Replace compounds decides scales routes multiplies with [FIVE WORDS]. Keep the period on each word and sequential random letter melt."

Change the path nodes

Ask your AI: "Rename Sense Route Compound to [THREE STEPS] and update the short notes. Keep the travel pulse and node fill on hit."

Change the lead

Ask your AI: "Change the lead paragraph to [YOUR COPY]. Keep it two sentences, calm enterprise voice."

Change the CTAs

Ask your AI: "Rename Begin with Nexus to [PRIMARY] and Read the architecture to [SECONDARY]."

Use a different background video

Ask your AI: "Replace the background video with [YOUR VIDEO LINK OR FILE]. Keep it muted, looping, free-playing, FULL uncut. Do not scroll-scrub. Keep the path rail and letter melt."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep Nexus enterprise neural intelligence chrome. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic 4K silent seamless loop, about 60 seconds, 24fps. Dark neural lattice network in void space, cyan and magenta glowing connections, slow camera drift, serious and cinematic. No logos, no UI text, no watermark. Full continuous run.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Nexus layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
