

YOUR PRODUCT PACKAGE

Prism

Liquid Glass Multi-Panel Identity Hero

A creative identity homepage where scroll advances a multi-face film while liquid glass panels of many sizes pop on both sides - ready for your AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

Offline file name if you were given a file: prism-faces-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Prism design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

File name: prism-faces-v1.mp4

What the film shows: surreal multi-persona face sculpture on soft cool-gray studio - stone, porcelain, and painted spectra morph and fragment, always centered with empty margins. About 48 seconds, silent. Designed for scroll scrub + floating UI glass.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file prism-faces-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium scroll-as-narrative website hero for a creative identity brand called PRISM.

BACKGROUND VIDEO (required - SCROLL SCRUB, not simple autoplay loop):

Use this video as the full-screen sticky hero film:

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

If the user has a local file named prism-faces-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Map page scroll progress (0 to 1) to video.currentTime (0 to duration) with GSAP ScrollTrigger scrub about 0.55. Pin or sticky a full-viewport stage inside a tall track about 520vh. Do NOT use autoplay loop as the primary mode. Pause the video and let scroll own time.

LOOK AND FEEL - LIQUID GLASS MATERIAL SYSTEM:

Soft studio mist canvas. Multi-face surreal sculpture stays CENTERED and clear.

Display: Syne (or geometric modern display). Body: DM Sans.

Accents: prism violet #A78BFA, soft violet #C4B5FD, cyan #67E8F9, fuchsia #F0ABFC.

Progress bar under nav: violet to fuchsia to cyan.

LIQUID GLASS (mandatory - not cheap single blur):

1) Include ONE SVG filter (feTurbulence + feGaussianBlur + feDisplacementMap) id prism-glass-distortion.

2) Each panel is a STACK: outer shell (backdrop-filter blur + saturate, soft white fill), specular top-edge highlight + hairline rim, and a stabilized darker plate under text for readability.

3) Tiers: thin chips (~12px blur, no distortion), standard (~18px), thick (~24px + distortion filter).

4) prefers-reduced-transparency: solid elevated cards, same layout.

LAYOUT LAW (critical - anti left-only trap):

Do NOT put all copy in a left column only.

Float MANY liquid glass panels of DIFFERENT sizes on BOTH left AND right margins of the stage.

Kinds: chip, metric, stat, profile card, quote, feature, CTA.

Stagger tops from ~18% to ~78%. Keep center faces open (no full-width text block).

Top-center chapter pill: 01 Spectrum / 02 Margins / 03 Clarity.

Top nav: PRISM + Liquid glass identity, links Studio Personas Materials Archive, right glass pill Enter studio.

Mobile: one thick bottom glass strip instead of many panels.

CHAPTERS:

1) Spectrum - "Every face is a spectrum." feature left + stats right

2) Margins - quote right, profile left, chips both sides, "Both margins speak."

3) Clarity - "Shatter into clarity." feature left + CTA "Build with Prism" right

TECHNICAL:

React + TypeScript + Tailwind. GSAP ScrollTrigger scrub mandatory.

Video: muted, playsinline, preload auto, object-fit cover. No autoplay as primary.

prefers-reduced-motion: single static mid frame, no scrub, 100vh track.

Closing dark atelier band below the track.

QUALITY BAR:

It should feel like a gallery installation UI with real liquid glass (shell + plate + light model), not glassmorphism wallpaper and not a left-only scroll essay.

Cursor prompt (continued)

When done: I should see the full Prism experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium scroll-as-narrative website hero for a creative identity brand called PRISM.

BACKGROUND VIDEO (required - SCROLL SCRUB, not simple autoplay loop):

Use this video as the full-screen sticky hero film:

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

If the user has a local file named prism-faces-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Map page scroll progress (0 to 1) to video.currentTime (0 to duration) with GSAP ScrollTrigger scrub about 0.55. Pin or sticky a full-viewport stage inside a tall track about 520vh. Do NOT use autoplay loop as the primary mode. Pause the video and let scroll own time.

LOOK AND FEEL - LIQUID GLASS MATERIAL SYSTEM:

Soft studio mist canvas. Multi-face surreal sculpture stays CENTERED and clear.

Display: Syne (or geometric modern display). Body: DM Sans.

Accents: prism violet #A78BFA, soft violet #C4B5FD, cyan #67E8F9, fuchsia #F0ABFC.

Progress bar under nav: violet to fuchsia to cyan.

LIQUID GLASS (mandatory - not cheap single blur):

1) Include ONE SVG filter (feTurbulence + feGaussianBlur + feDisplacementMap) id prism-glass-distortion.

2) Each panel is a STACK: outer shell (backdrop-filter blur + saturate, soft white fill), specular top-edge highlight + hairline rim, and a stabilized darker plate under text for readability.

QUALITY BAR:

Your Smart AI Agent prompt (continued)

It should feel like a gallery installation UI with real liquid glass (shell + plate + light model), not glassmorphism wallpaper and not a left-only scroll essay.

When done: I should see the full Prism experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name PRISM to [YOUR BRAND NAME] everywhere, including the top left."

Rewrite panel copy

Ask your AI: "Rewrite the glass panel titles and bodies to [YOUR COPY]. Keep both-side multi-panel layout."

Add or remove panels

Ask your AI: "Add two more small glass chips on the right and remove the profile card. Keep liquid glass tiers."

Change button labels

Ask your AI: "Rename Enter studio to [PRIMARY] and Build with Prism to [SECONDARY]. Keep glass buttons."

Change colors

Ask your AI: "Swap violet #A78BFA and cyan #67E8F9 to [ACCENT A] and [ACCENT B]. Keep readable white type on glass plates."

Use a different background video

Ask your AI: "Replace the background video with [YOUR VIDEO]. Keep scroll scrub and both-side glass panels."

Make it work on phones

Ask your AI: "On mobile stack a single thick glass strip at the bottom; hide multi-panel field under 640px."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep Prism liquid glass multi-panel style. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic 4K silent 24fps. Soft cool gray studio. Center floating multi-face identity sculpture morphing and fragmenting (stone, porcelain, iridescent paint). Generous empty left and right thirds for UI. No logos, no readable UI chrome.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Prism layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
