

YOUR PRODUCT PACKAGE

Revel

Scroll Narrative Fashion Commerce Hero

A light pearl fashion homepage where scroll advances an iPhone breakout film - four chapters from feed to freedom, rose-gold type, ready for your AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/revel-breakout-v1.mp4>

Offline file name if you were given a file: revel-breakout-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Revel design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/revel-breakout-v1.mp4>

File name: revel-breakout-v1.mp4

What the film shows: gold iPhone social-commerce breakout - floating phone and icons, glass shatter by a shoe, suspended shards, woman leaping free. About 20 seconds, pearl studio, rose silk, no sound. Designed for scroll scrub.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file revel-breakout-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium scroll-as-narrative website hero for a fashion commerce brand called REVEL.

BACKGROUND VIDEO (required - SCROLL SCRUB, not simple autoplay loop):

Use this video as the full-screen sticky hero film:

<https://www.ClickMotion.dev/assets/videos/revel-breakout-v1.mp4>

If the user has a local file named revel-breakout-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Map page scroll progress (0 to 1) to video.currentTime (0 to duration) with GSAP ScrollTrigger scrub about 0.5. Pin or sticky a full-viewport stage inside a tall track about 480vh. Do NOT use autoplay loop as the primary mode. Pause the video and let scroll own time.

LOOK AND FEEL:

Pearl light canvas #F7F4F1. Charcoal ink #1A1614. Rose gold #C4A574 and soft blush #E8B4B8 accents.

Display: Instrument Serif (or elegant editorial serif) for big titles. Body: Inter light.

Thin rose-gold progress bar under the nav. Fashion uppercase tracking. Light studio luxury.

This is a LIGHT mode hero. Never dark private-bank Meridian gold coastal, never mono Vertex security, never neon cyberpunk rain city, never quantum void cyan, never forest climate sage.

LAYOUT:

Tall scroll track with sticky full-viewport stage.

Top nav: brand REVEL + Fashion Commerce, center links Collections Lookbook Campaigns Journal, right pill "Enter atelier".

Four chapters swap as scroll progresses:

- 1) The feed - "She lived / inside the glow." (floating gold phone, social icons)
- 2) The break - "Then something / had to give." (shoe shatters glass)
- 3) The shatter - "Shards of / attention fall." (glass and icons midair)
- 4) The arrival - "Now she / owns the room." (woman free mid-leap) with CTAs Shop the drop and Watch campaign.

Right rail chapter indices 01-04. Scroll cue at start. Closing atelier band below the track.

TECHNICAL:

React + TypeScript + Tailwind. GSAP ScrollTrigger scrub is mandatory for the signature. Video: muted, playsInline, preload auto, object-fit cover. No autoPlay as primary, prefers-reduced-motion: single static frame, no scrub, 100vh track. Keep cream type legible over the film with soft bottom dark scrim and top pearl fade.

QUALITY BAR:

It should feel like a high-fashion campaign site, not a generic AI social template. One clear system: scroll owns the breakout film + rose-gold editorial type.

When done: I should see the full Revel experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium scroll-as-narrative website hero for a fashion commerce brand called REVEL.

BACKGROUND VIDEO (required - SCROLL SCRUB, not simple autoplay loop):

Use this video as the full-screen sticky hero film:

<https://www.ClickMotion.dev/assets/videos/revel-breakout-v1.mp4>

If the user has a local file named revel-breakout-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Map page scroll progress (0 to 1) to video.currentTime (0 to duration) with GSAP ScrollTrigger scrub about 0.5. Pin or sticky a full-viewport stage inside a tall track about 480vh. Do NOT use autoplay loop as the primary mode. Pause the video and let scroll own time.

LOOK AND FEEL:

Pearl light canvas #F7F4F1. Charcoal ink #1A1614. Rose gold #C4A574 and soft blush #E8B4B8 accents.

Display: Instrument Serif (or elegant editorial serif) for big titles. Body: Inter light.

Thin rose-gold progress bar under the nav. Fashion uppercase tracking. Light studio luxury.

This is a LIGHT mode hero. Never dark private-bank Meridian gold coastal, never mono Vertex security, never neon cyberpunk rain city, never quantum void cyan, never forest climate sage.

LAYOUT:

Tall scroll track with sticky full-viewport stage.

Top nav: brand REVEL + Fashion Commerce, center links Collections Lookbook Campaigns Journal, right pill "Enter atelier".

Four chapters swap as scroll progresses:

- 1) The feed - "She lived / inside the glow." (floating gold phone, social icons)
 - 2) The break - "Then something / had to give." (shoe shatters glass)
 - 3) The shatter - "Shards of / attention fall." (glass and icons midair)
 - 4) The arrival - "Now she / owns the room." (woman free mid-leap) with CTAs Shop the drop and Watch campaign.
- Right rail chapter indices 01-04. Scroll cue at start. Closing atelier band below the track.

TECHNICAL:

React + TypeScript + Tailwind. GSAP ScrollTrigger scrub is mandatory for the signature. Video: muted, playsInline, preload auto, object-fit cover. No autoPlay as primary. prefers-reduced-motion: single static frame, no scrub, 100vh track. Keep cream type legible over the film with soft bottom dark scrim and top pearl fade.

QUALITY BAR:

It should feel like a high-fashion campaign site, not a generic AI social template. One clear system: scroll owns the breakout film + rose-gold editorial type.

When done: I should see the full Revel experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Grok Build

Select everything in the box area below (all parts if more than one page). Copy, then paste into Grok Build. You do not need to understand the technical lines. Your AI does.

Build this as a complete, production-ready web section in Grok Build. Prefer a single polished component or page I can run immediately.

Build a premium scroll-as-narrative website hero for a fashion commerce brand called REVEL.

BACKGROUND VIDEO (required - SCROLL SCRUB, not simple autoplay loop):

Use this video as the full-screen sticky hero film:

<https://www.ClickMotion.dev/assets/videos/revel-breakout-v1.mp4>

If the user has a local file named revel-breakout-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Map page scroll progress (0 to 1) to video.currentTime (0 to duration) with GSAP ScrollTrigger scrub about 0.5. Pin or sticky a full-viewport stage inside a tall track about 480vh. Do NOT use autoplay loop as the primary mode. Pause the video and let scroll own time.

LOOK AND FEEL:

Pearl light canvas #F7F4F1. Charcoal ink #1A1614. Rose gold #C4A574 and soft blush #E8B4B8 accents.

Display: Instrument Serif (or elegant editorial serif) for big titles. Body: Inter light.

Thin rose-gold progress bar under the nav. Fashion uppercase tracking. Light studio luxury.

This is a LIGHT mode hero. Never dark private-bank Meridian gold coastal, never mono Vertex security, never neon cyberpunk rain city, never quantum void cyan, never forest climate sage.

It should feel like a high-fashion campaign site, not a generic AI social template. One clear system: scroll owns the breakout film + rose-gold editorial type.

When done: I should see the full Revel experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name REVEL to [YOUR BRAND NAME] everywhere, including the top left."

Change chapter headlines

Ask your AI: "Rewrite the four chapter titles to [YOUR FOUR PAIRS OF LINES]. Keep Instrument Serif and cream type on the film."

Change chapter bodies

Ask your AI: "Rewrite each chapter body paragraph to [YOUR COPY]. Keep short editorial lines."

Change button labels

Ask your AI: "Rename Shop the drop to [PRIMARY] and Watch campaign to [SECONDARY]. Keep charcoal primary and frost secondary."

Change colors

Ask your AI: "Swap rose gold #C4A574 and blush #E8B4B8 to [ACCENT A] and [ACCENT B]. Keep pearl canvas and readable contrast."

Use a different background video

Ask your AI: "Replace the scrubbed video with [YOUR VIDEO LINK OR FILE NAME]. Keep scroll owning currentTime, not autoplay loop."

Make it work on phones

Ask your AI: "Improve mobile layout so headlines never clip, center nav hides, CTAs stack, scroll scrub still works."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep the Revel light pearl / rose-gold fashion scroll style. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic 4K seamless narrative, silent, 24fps. Gold smartphone in a bright pearl fashion studio, social icons orbit, then a shoe shatters the glass screen, shards and hearts float, a woman breaks free mid-leap. Rose gold and blush accents. No readable brand logos as UI. High-fashion campaign look.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Revel layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
