

YOUR PRODUCT PACKAGE

Vertex

Cybersecurity Scroll Hero

A monochrome enterprise security homepage that hardens as visitors scroll. Serious authority, ready to build with your favorite AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/vertex-globe-web-v1.mp4>

Offline file name if you were given a file: vertex-globe-web-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Vertex design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/vertex-globe-web-v1.mp4>

File name: vertex-globe-web-v1.mp4

What the film shows: abstract wireframe / globe cybersecurity atmosphere, dark monochrome motion suitable for a scroll narrative. About 12 seconds, no sound.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file vertex-globe-web-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport website hero for an enterprise cybersecurity brand called VERTEX SECURITY (short brand mark: VERTEX).

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/vertex-globe-web-v1.mp4>

If the user has a local file named vertex-globe-web-v1.mp4, use that file path in the project instead of downloading.

The video must be silent. Do not autoplay as a looping wallpaper. Scroll position controls which moment of the video is shown (scroll scrub). When the visitor scrolls down, the video advances. When they scroll up, it goes backward.

LOOK AND FEEL:

Pure black canvas #000000. Pure white type. Monochrome brutalist. Display: Space Grotesk bold for big titles. Body: Inter.

CTAs are sharp rectangles with radius 0 (no rounded pills). Primary CTA: white fill black text. Secondary: white outline.

Left-heavy black scrim so type stays readable over the globe film.

Serious SOC / enterprise security vendor. Never cyan-pink neon kits, aurora mesh, glass pill docks, shiny rainbow text, or emoji.

LAYOUT:

A tall page. Hero stage sticks full viewport while scroll moves the video (about 4+ screen heights). There is NO closing membership footer band. The story ends when the scroll track ends.

Top: brand VERTEX, links Platform, Threat Intel, Solutions, Company, and a sharp "Request Demo" button. Thin white progress hairline under the nav that fills as they scroll.

Left story copy changes in three chapters:

Chapter 1 (start): eyebrow "Zero Trust Architecture", titles "SECURITY." / "WITHOUT COMPROMISE.", body about preventing zero-day and nation-state threats.

Chapter 2 (middle): eyebrow "Global Threat Fabric", titles "Every packet" / "is a signal.", body about live telemetry and intent.

Chapter 3 (end): eyebrow "Built for SOC teams", titles "Prevention" / "is the product.", dual CTAs "Request Demo" and "View Threat Intel", stats like "< 4m MTTR · 99.99% Coverage · 2,400+ SOC teams".

Right side large screens: chapter markers 01 02 03, active one bright.

At the start only: a small Scroll cue. Safe padding so type never clips.

TECHNICAL (you the AI implement this):

Modern web stack for my tool. Prefer one main component. Map scroll progress to video.currentTime (GSAP ScrollTrigger scrub around 0.45 or a scroll listener). Video: muted, playsInline, no autoplay loop, pause and only seek. Reduced-motion: still frame + chapter 1 only. Dark scrim for readability.

QUALITY BAR:

Linear / Stripe enterprise density meets brutalist editorial. One clear system: scroll owns the film. No generic AI SaaS look.

When done: I should see the full Vertex experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium full-viewport website hero for an enterprise cybersecurity brand called VERTEX SECURITY (short brand mark: VERTEX).

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/vertex-globe-web-v1.mp4>

If the user has a local file named vertex-globe-web-v1.mp4, use that file path in the project instead of downloading.

The video must be silent. Do not autoplay as a looping wallpaper. Scroll position controls which moment of the video is shown (scroll scrub). When the visitor scrolls down, the video advances. When they scroll up, it goes backward.

LOOK AND FEEL:

Pure black canvas #000000. Pure white type. Monochrome brutalist. Display: Space Grotesk bold for big titles. Body: Inter.

CTAs are sharp rectangles with radius 0 (no rounded pills). Primary CTA: white fill black text. Secondary: white outline.

Left-heavy black scrim so type stays readable over the globe film.

Serious SOC / enterprise security vendor. Never cyan-pink neon kits, aurora mesh, glass pill docks, shiny rainbow text, or emoji.

LAYOUT:

A tall page. Hero stage sticks full viewport while scroll moves the video (about 4+ screen heights). There is NO closing membership footer band. The story ends when the scroll track ends.

Top: brand VERTEX, links Platform, Threat Intel, Solutions, Company, and a sharp "Request Demo" button. Thin white progress hairline under the nav that fills as they scroll.

Left story copy changes in three chapters:

Chapter 1 (start): eyebrow "Zero Trust Architecture", titles "SECURITY." / "WITHOUT COMPROMISE.", body about preventing zero-day and nation-state threats.

Chapter 2 (middle): eyebrow "Global Threat Fabric", titles "Every packet" / "is a signal.", body about live telemetry and intent.

Chapter 3 (end): eyebrow "Built for SOC teams", titles "Prevention" / "is the product.", dual CTAs "Request Demo" and "View Threat Intel", stats like "< 4m MTTR · 99.99% Coverage · 2,400+ SOC teams".

Right side large screens: chapter markers 01 02 03, active one bright.

At the start only: a small Scroll cue. Safe padding so type never clips.

TECHNICAL (you the AI implement this):

Modern web stack for my tool. Prefer one main component. Map scroll progress to video.currentTime (GSAP ScrollTrigger scrub around 0.45 or a scroll listener). Video: muted, playsInline, no autoplay loop, pause and only seek. Reduced-motion: still frame + chapter 1 only. Dark scrim for readability.

QUALITY BAR:

Linear / Stripe enterprise density meets brutalist editorial. One clear system: scroll owns the film. No generic AI SaaS look.

When done: I should see the full Vertex experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Grok Build

Select everything in the box area below (all parts if more than one page). Copy, then paste into Grok Build. You do not need to understand the technical lines. Your AI does.

Build this as a complete, production-ready web section in Grok Build. Prefer a single polished component or page I can run immediately.

Build a premium full-viewport website hero for an enterprise cybersecurity brand called VERTEX SECURITY (short brand mark: VERTEX).

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/vertex-globe-web-v1.mp4>

If the user has a local file named vertex-globe-web-v1.mp4, use that file path in the project instead of downloading.

The video must be silent. Do not autoplay as a looping wallpaper. Scroll position controls which moment of the video is shown (scroll scrub). When the visitor scrolls down, the video advances. When they scroll up, it goes backward.

When done: I should see the full Vertex experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name VERTEX to [YOUR BRAND NAME] everywhere in the design, including the top corner."

Change the big headlines

Ask your AI: "Change the first chapter titles to [LINE 1] and [LINE 2]. Keep brutalist Space Grotesk style."

Change eyebrows and body

Ask your AI: "Change the chapter eyebrow labels and body paragraphs to [YOUR COPY]. Keep three chapters."

Change button labels

Ask your AI: "Rename Request Demo to [PRIMARY]. Rename View Threat Intel to [SECONDARY]. Keep sharp zero-radius buttons."

Change colors

Ask your AI: "Keep monochrome brutalist, but if you introduce one accent use [YOUR HEX] sparingly. Keep text highly readable."

Use a different background video

Ask your AI: "Replace the background video with [YOUR VIDEO LINK OR FILE NAME]. Keep scroll controlling the video, silent, no wallpaper loop."

Make it work on phones

Ask your AI: "Improve the mobile layout so type never clips, CTAs are easy to tap, and the scroll narrative still feels serious and premium."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep the Vertex brutalist security style. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic 4K about 12 seconds, no audio, 24 frames per second. Abstract dark monochrome wireframe globe and network nodes, slow camera drift, enterprise cybersecurity atmosphere. No people, no readable UI text, no logos, no neon rainbow. Serious, technical, restrained. Seamless emotional arc for scroll scrubbing.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Vertex layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
