

YOUR PRODUCT PACKAGE

Helix

Helical Design Gallery Carousel Section

A spatial mid-page gallery where your work rides a 3D helix as titles cross the stage - fully customizable cards, copy, and color, free for your AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/helix-gallery-preview-v1.mp4>

Offline file name if you were given a file: helix-gallery-preview-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Helix design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/helix-gallery-preview-v1.mp4>

File name: helix-gallery-preview-v1.mp4

Client media is nine gallery stills on a helical carousel (swap for your work). Storefront presentation shows the full stage, crossing titles, brand wordmark, and WebGL cards over a full scroll pin (about 28 seconds).

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file helix-gallery-preview-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium mid-page website SECTION (not a full-bleed hero) for a design-studio gallery brand called HELIX.

This is a SPATIAL GALLERY CAROUSEL. Solid stage color (#C3C3C3 by default, fully recolorable) with a WebGL cylindrical card helix. Cards are the focus so the buyer can load their own work. Do not force a loud underlay film unless the buyer asks for a soft stage treatment.

GALLERY STILLs (required - nine images on the helix - replace with buyer work):

Default demo textures (load order reverse: 09 down to 01):

<https://www.ClickMotion.dev/assets/images/orbit/orbit-01.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-02.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-03.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-04.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-05.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-06.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-07.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-08.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-09.jpg>

If the user has local files named orbit-01.jpg through orbit-09.jpg, use those paths instead.

Each card is a rounded rectangle on a helical ribbon (radius about 12, two full turns, spacing about 6.2). Thin gray guide rails along the path.

The buyer will swap every card for their portfolio, UI frames, campaigns, or product boards. Prefer portrait-ish high-resolution stills without watermarks.

LOOK AND FEEL - EDITORIAL GALLERY (not SaaS glass):

Stage #C3C3C3. Ink #0a0a0a / #1a1a1a. Quiet Swiss board. Private design studio.

Display: geometric sans (Neue Haas / Inter / Helvetica Neue). Wordmark: Birthstone script for demo brand ClickMotion (buyer will rebrand).

Never purple mesh, never Motionsites pill docks, never a required third-party Dribbble button.

SIGNATURE A - CROSSING TITLES:

Giant uppercase "Design in" starts off the left and travels right.

Giant uppercase "motion" starts off the right and travels left.

They peak near center early, then continue out of frame as scroll finishes.

Backface-hidden for clean motion. Both strings are buyer-editable.

SIGNATURE B - CENTER LOCKUP:

Above a quiet uppercase line "Exploring ideas through / daily design practice." place the brand wordmark in Birthstone (default ClickMotion). Fade the lockup in the second half of the scroll. All of these strings are buyer-editable.

SIGNATURE C - WebGL HELIX:

React Three Fiber Canvas full viewport, transparent clear, high-performance. Cards ease in from off-path as scroll advances (do not seed mid-arc on first paint). Pin type fixed so the canvas fills the viewport (never stuck at 300x150).

LAYOUT:

Section only - no forced page header/footer.

Pin stage 100dvh solid stage color. Scroll length about 5 viewport heights on desktop, 3 on mobile.

Stack: titles + concepts under the canvas; concepts bottom-left three lines (buyer-editable).

Pin spacer background must match the stage (no white flash).

TECHNICAL:

Cursor prompt (continued)

React + TypeScript. GSAP ScrollTrigger scrub for pin + title x. Lenis smooth scroll coupled to ScrollTrigger.update.
three + @react-three/fiber for helix. Birthstone from Google Fonts for wordmark (or buyer brand font).
prefers-reduced-motion: static mid pose, titles near center, no long scrub required.
Single default-export component HelixGallerySection.

CUSTOMIZATION LAW:

Every visible string and every card image must be easy to replace. After the default builds, the buyer will tell their AI to restage brand, titles, center lines, concepts copy, nine cards, and stage color until the section feels made for their brand alone.

QUALITY BAR:

It should feel like a private viewing of craft work on a calm board - spatial, intentional, complete. Scroll owns the helix. Cards own the focus.

REFERENCE MOTION (storefront presentation of the full section):

<https://www.ClickMotion.dev/assets/videos/helix-gallery-preview-v1.mp4>

When done: I should see the full Helix experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Copy this into Your Smart AI Agent

Select everything in the box area below (all parts if more than one page). Copy, then paste into Your Smart AI Agent. You do not need to understand the technical lines. Your AI does.

You are my smart AI agent. I may not be a professional programmer. Build a complete, production-ready website hero from the brief below. You choose the stack that works in my environment, create every file, wire the background video, and deliver a polished preview. Do not leave steps for me that require writing code. When finished, explain in plain English how I view and share the result.

Build a premium mid-page website SECTION (not a full-bleed hero) for a design-studio gallery brand called HELIX.

This is a SPATIAL GALLERY CAROUSEL. Solid stage color (#C3C3C3 by default, fully recolorable) with a WebGL cylindrical card helix. Cards are the focus so the buyer can load their own work. Do not force a loud underlay film unless the buyer asks for a soft stage treatment.

GALLERY STILLs (required - nine images on the helix - replace with buyer work):

Default demo textures (load order reverse: 09 down to 01):

<https://www.ClickMotion.dev/assets/images/orbit/orbit-01.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-02.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-03.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-04.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-05.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-06.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-07.jpg>, <https://www.ClickMotion.dev/assets/images/orbit/orbit-08.jpg>,
<https://www.ClickMotion.dev/assets/images/orbit/orbit-09.jpg>

If the user has local files named orbit-01.jpg through orbit-09.jpg, use those paths instead.

Each card is a rounded rectangle on a helical ribbon (radius about 12, two full turns, spacing about 6.2). Thin gray guide rails along the path.

The buyer will swap every card for their portfolio, UI frames, campaigns, or product boards. Prefer portrait-ish high-resolution stills without watermarks.

LOOK AND FEEL - EDITORIAL GALLERY (not SaaS glass):

Stage #C3C3C3. Ink #0a0a0a / #1a1a1a. Quiet Swiss board. Private design studio.

Display: geometric sans (Neue Haas / Inter / Helvetica Neue). Wordmark: Birthstone script for demo brand ClickMotion (buyer will rebrand).

Never purple mesh, never Motionsites pill docks, never a required third-party Dribbble button.

SIGNATURE A - CROSSING TITLES:

Giant uppercase "Design in" starts off the left and travels right.

Giant uppercase "motion" starts off the right and travels left.

They peak near center early, then continue out of frame as scroll finishes.

Backface-hidden for clean motion. Both strings are buyer-editable.

SIGNATURE B - CENTER LOCKUP:

Above a quiet uppercase line "Exploring ideas through / daily design practice." place the brand wordmark in Birthstone (default ClickMotion). Fade the lockup in the second half of the scroll. All of these strings are buyer-editable.

SIGNATURE C - WebGL HELIX:

React Three Fiber Canvas full viewport, transparent clear, high-performance. Cards ease in from off-path as scroll advances (do not seed mid-arc on first paint). Pin type fixed so the canvas fills the viewport (never stuck at 300x150).

LAYOUT:

Section only - no forced page header/footer.

Pin stage 100dvh solid stage color. Scroll length about 5 viewport heights on desktop, 3 on mobile.

Stack: titles + concepts under the canvas; concepts bottom-left three lines (buyer-editable).

Pin spacer background must match the stage (no white flash).

Your Smart AI Agent prompt (continued)

TECHNICAL:

React + TypeScript. GSAP ScrollTrigger scrub for pin + title x. Lenis smooth scroll coupled to ScrollTrigger.update.
three + @react-three/fiber for helix. Birthstone from Google Fonts for wordmark (or buyer brand font).
prefers-reduced-motion: static mid pose, titles near center, no long scrub required.
Single default-export component HelixGallerySection.

CUSTOMIZATION LAW:

Every visible string and every card image must be easy to replace. After the default builds, the buyer will tell their AI to restage brand, titles, center lines, concepts copy, nine cards, and stage color until the section feels made for their brand alone.

QUALITY BAR:

It should feel like a private viewing of craft work on a calm board - spatial, intentional, complete. Scroll owns the helix. Cards own the focus.

REFERENCE MOTION (storefront presentation of the full section):

<https://www.ClickMotion.dev/assets/videos/helix-gallery-preview-v1.mp4>

When done: I should see the full Helix experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand wordmark

Ask your AI: "Change the center wordmark from ClickMotion to [YOUR BRAND NAME]. Keep it one line, elegant script or brand font, centered above the small uppercase lines. Update aria-label to match."

Change the giant titles

Ask your AI: "Change the left-entering giant title from Design in to [TITLE A] and the right-entering title from motion to [TITLE B]. Keep uppercase, huge clamp sizing, and the left-to-right / right-to-left cross."

Change the center lines

Ask your AI: "Change the two center uppercase lines to [LINE 1] and [LINE 2]. Keep small tracking under the wordmark and the late-scroll fade."

Change the concepts copy

Ask your AI: "Replace the bottom-left three-line concepts paragraph with [LINE 1] / [LINE 2] / [LINE 3]. Keep left-aligned under the cards in z-order."

Load your nine gallery images

Ask your AI: "Replace orbit-01 through orbit-09 with [YOUR NINE IMAGE PATHS OR DESCRIPTIONS]. Keep rounded cards, helix path, and high-quality textures. If I only give descriptions, generate tasteful boards that match [BRAND TONE]."

Change stage and type color

Ask your AI: "Change the stage color #C3C3C3 to [STAGE HEX] and type ink to [INK HEX]. Match the pin spacer to the stage so there is no white flash. Keep wordmark readable."

Brand voice pass

Ask your AI: "Rewrite every visible string so the voice matches [BRAND VOICE]. Do not change helix math or scroll pin behavior unless I ask."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep Helix as a spatial mid-page gallery with scroll-pinned helix cards and crossing titles. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Generate nine premium UI/design mock stills for the helix cards (portrait boards, fashion / product / editorial) as orbit-01.jpg through orbit-09.jpg, clean, high resolution, no watermarks, consistent lighting. Or replace with the buyer's own nine images when provided.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Helix layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
