

YOUR PRODUCT PACKAGE

Lineup

Product Line Scroll Reveal Section

Your products enter one by one as the visitor scrolls - a living 3D vessel, soft copy, and a quiet stage that can hold any line from two SKUs to a full collection.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/lineup-reveal-preview-v1.mp4>

Offline file name if you were given a file: lineup-reveal-preview-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Lineup design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/lineup-reveal-preview-v1.mp4>

File name: lineup-reveal-preview-v1.mp4

Client media is the 3D product pack (mesh, labels, HDRI). Storefront presentation shows the full pin journey through the demo SKUs with natural holds and eases between products (about 24-28 seconds).

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file lineup-reveal-preview-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium mid-page website SECTION (not a full-bleed hero) called LINEUP - a product line scroll reveal.

This is a PINNED PRODUCT REVEAL. Bone paper stage (#efede6). As the visitor scrolls, each segment of the pin introduces a new SKU: 3D product vessel cross-fades on the right, soft bloom tint changes, giant ghost number, and left copy card rebuilds (wordmark, name, subtitle, pitch, optional spec rows). Desktop pin length equals N viewport heights where N is the number of products in a data array. Snap points at 0, 1/N, 2/N, ..., 1. Mobile uses horizontal snap cards. Keyboard arrows jump SKUs while the section is in view.

DEFAULT DEMO (replace entirely): three nootropic cans Clear / Dawn / Dusk (ACTUALLY.01-03) with can.glb and label textures still-01/02/03. Spec sheet L-Theanine, Lion's Mane, Rhodiola, Bacopa with Active blend 1,150 mg. Demo is a starting board only.

CLIENT MEDIA:

- Mesh: <https://www.ClickMotion.dev/models/can.glb> (buyer may replace with any product vessel - bottle, box, device, pouch)
- Labels: <https://www.ClickMotion.dev/textures/labels/still-01-clear-2.png> (and dawn/dusk variants); each product may set labelPath
- HDRI: https://www.ClickMotion.dev/hdri/studio_small_03_1k.hdr (Environment background=false)

CRITICAL - EXPANDABLE PRODUCT COUNT (data-driven N):

Drive the UI from lineup-data.ts: PRODUCTS array (length N, default 3) + SECTION_META (eyebrow, H2, total footer labels) + SPEC_ROWS.

Pin end = $N * 100vh$. Snap = $0..1/N..1$. Tabs 01..N. Blooms, ghosts, 3D stage all map over PRODUCTS.

Buyer can expand to 4-8 or reduce to 2 without rewriting scroll math. Always update SECTION_META title/eyebrow when N changes - never leave "Three formulations." when N is not 3.

Each product supports labelPath and optional meshPath so AI can place any product textures without hardcoding LABEL_MAP only.

LOOK: editorial CPG tasting room. Display serif for names. Heavy geometric wordmark for SKU line. No purple mesh, no Motionsites docks, no free-play background film. Not a flat shop grid. Not a full-bleed hero (pair with Actually! hero above if desired).

TECHNICAL:

React + TypeScript. GSAP ScrollTrigger pin scrub + snap. Lenis. three + @react-three/fiber + drei. Single default-export LineupSection. prefers-reduced-motion: first product static, readable copy.

Cleanroom: cleanroom/lineup-from-prompt/ with CUSTOMIZATION.md for AI expand playbook.

CUSTOMIZATION LAW:

Every string, product object, mesh, label, color, spec row, and N count is replaceable. After default builds, restage for buyer brand and product type (beverage, skincare, hardware, wine, apparel, multi-SKU CPG). dosageMg is a generic numeric column - reuse for prices, ml, SPF, watts.

REFERENCE MOTION (storefront presentation of full pin journey):

<https://www.ClickMotion.dev/assets/videos/lineup-reveal-preview-v1.mp4>

When done: I should see the full Lineup experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium mid-page website SECTION (not a full-bleed hero) called LINEUP - a product line scroll reveal.

This is a PINNED PRODUCT REVEAL. Bone paper stage (#efede6). As the visitor scrolls, each segment of the pin introduces a new SKU: 3D product vessel cross-fades on the right, soft bloom tint changes, giant ghost number, and left copy card rebuilds (wordmark, name, subtitle, pitch, optional spec rows). Copy this into Your Smart AI Agent

Select everything in the box area below (all parts if more than one page). Copy, then paste into Your Smart AI Agent. You do not need to understand the technical lines. Your AI does.

You are my smart AI agent. I may not be a professional programmer. Build a complete, production-ready website hero from the brief below. You choose the stack that works in my environment, create every file, wire the background video, and deliver a polished preview. Do not leave steps for me that require writing code. When finished, explain in plain English how I view and share the result.

Build a premium mid-page website SECTION (not a full-bleed hero) called LINEUP - a product line scroll reveal.

This is a PINNED PRODUCT REVEAL. Bone paper stage (#efede6). As the visitor scrolls, each segment of the pin introduces a new SKU: 3D product vessel cross-fades on the right, soft bloom tint changes, giant ghost number, and left copy card rebuilds (wordmark, name, subtitle, pitch, optional spec rows). Desktop pin length equals N viewport heights where N is the number of products in a data array. Snap points at 0, 1/N, 2/N, ..., 1. Mobile uses horizontal snap cards. Keyboard arrows jump SKUs while the section is in view.

DEFAULT DEMO (replace entirely): three nootropic cans Clear / Dawn / Dusk (ACTUALLY.01-03) with can.glb and label textures still-01/02/03. Spec sheet L-Theanine, Lion's Mane, Rhodiola, Bacopa with Active blend 1,150 mg. Demo is a starting board only.

CLIENT MEDIA:

- Mesh: <https://www.ClickMotion.dev/models/can.glb> (buyer may replace with any product vessel - bottle, box, device, pouch)
- Labels: <https://www.ClickMotion.dev/textures/labels/still-01-clear-2.png> (and dawn/dusk variants); each product may set labelPath
- HDR: https://www.ClickMotion.dev/hdri/studio_small_03_1k.hdr (Environment background=false)

CRITICAL - EXPANDABLE PRODUCT COUNT (data-driven N):

Drive the UI from lineup-data.ts: PRODUCTS array (length N, default 3) + SECTION_META (eyebrow, H2, total footer labels) + SPEC_ROWS.

Pin end = $N * 100vh$. Snap = $0..1/N..1$. Tabs 01..N. Blooms, ghosts, 3D stage all map over PRODUCTS.

Buyer can expand to 4-8 or reduce to 2 without rewriting scroll math. Always update SECTION_META title/eyebrow when N changes - never leave "Three formulations." when N is not 3.

Each product supports labelPath and optional meshPath so AI can place any product textures without hardcoding LABEL_MAP only.

LOOK: editorial CPG tasting room. Display serif for names. Heavy geometric wordmark for SKU line. No purple mesh, no Motionsites docks, no free-play background film. Not a flat shop grid. Not a full-bleed hero (pair with Actually! hero above if desired).

TECHNICAL:

React + TypeScript. GSAP ScrollTrigger pin scrub + snap. Lenis. three + @react-three/fiber + drei. Single default-export LineupSection. prefers-reduced-motion: first product static, readable copy.

Cleanroom: cleanroom/lineup-from-prompt/ with CUSTOMIZATION.md for AI expand playbook.

CUSTOMIZATION LAW:

Every string, product object, mesh, label, color, spec row, and N count is replaceable. After default builds, restage for buyer brand and product type (beverage, skincare, hardware, wine, apparel, multi-SKU CPG). dosageMg is a generic numeric column - reuse for prices, ml, SPF, watts.

REFERENCE MOTION (storefront presentation of full pin journey):

<https://www.ClickMotion.dev/assets/videos/lineup-reveal-preview-v1.mp4>

When done: I should see the full Lineup experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Replace the whole product line

Ask your AI: "Replace PRODUCTS and SECTION_META in lineup-data.ts with my brand [NAME] and products: [LIST with name, subtitle, pitch, accent hex, sku, label path]. Keep pin snap and 3D cross-fade. H2 and eyebrow must match count N. Never leave ACTUALLY demo copy."

Expand to more products

Ask your AI: "Expand Lineup from 3 to [N] products using [DATA]. Pin must be $N * 100vh$ with snap 0...1. Tabs 01...N. Update SECTION_META title and eyebrow. Add labelPath for every new SKU. Do not hardcode $N=3$."

Reduce products

Ask your AI: "Remove products [ids] from PRODUCTS. Update SECTION_META for the new count. Pin and snap must shrink with PRODUCTS.length."

Any product vessel (not a can)

Ask your AI: "Replace can.glb with [MESH] and labels with [TEXTURES or art direction]. Set meshPath/labelPath per product. Frame a bottle/box/device with correct targetHeight and camera. Keep cross-fade stage motion."

Change industry / specs

Ask your AI: "Rewrite names, pitches, and SPEC_ROWS for [CATEGORY: skincare/wine/hardware/apparel]. Replace SECTION_META totalLabel, totalUnit, specUnit, leadBadge. dosageMg is just the numeric cell."

Brand and colors

Ask your AI: "Change bone/ink CSS vars to [PAPER]/[INK]. Set each bloomColor to my palette. Change ACTUALLY.01 wordmarks to [BRAND].01 style."

Place after Actually! hero

Ask your AI: "Mount LineupSection below ActuallyHero. Shared Lenis + ScrollTrigger. Keep both bone stages coherent. No forced site chrome inside either component."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE]. Keep Lineup as a scroll-pinned multi-SKU reveal with data-driven N products from PRODUCTS. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

No looping background film required. Optional: generate label art or product stills for each SKU as clean editorial boards, no watermarks, ready as public textures.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Lineup layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
