

YOUR PRODUCT PACKAGE

ApexQuantum

Deep Tech Quantum Hero

A void-indigo quantum platform homepage with cryogenic lab film, JetBrains Mono type, and cyan instrument glass. Deep-tech energy, ready to build with your favorite AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/apex-quantum-v1.mp4>

Offline file name if you were given a file: apex-quantum-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the ApexQuantum design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/apex-quantum-v1.mp4>

File name: apex-quantum-v1.mp4

What the film shows: empty cryogenic quantum lab / cryostat tower environment, electric cyan and controlled violet instrument light, slow cinematic push. About 60 seconds, seamless loop feel, no sound.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file apex-quantum-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport website hero for a deep-tech quantum computing brand called APEX QUANTUM.

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/apex-quantum-v1.mp4>

If the user has a local file named apex-quantum-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Play it as a looping cinematic wallpaper (autoplay, muted, loop, playsInline). Do NOT use scroll-scrub timeline control.

Optional light parallax scale on desktop only (about 1.0 to 1.04). Pause when the hero is off-screen.

LOOK AND FEEL:

Void indigo canvas #070A1A. Ice headlines #E8F0FF. Electric quantum cyan #00D4FF and controlled violet #A855F7 as the only accents.

Display: JetBrains Mono for big titles. Body: Inter light.

Cold cyan-tinted liquid-glass navigation and secondary buttons. Primary CTAs are cyan pills with void text.

Left-heavy dual void scrims so type stays readable over the cryogenic quantum lab film.

Deep-tech scientific prestige. Never pink neon rain city kits (Neon), purple mesh SaaS wallpaper, shiny rainbow text, emoji, cream wellness spa (Aether), amber film-lot espresso (Lumina), forest sage climate (Terra), multi-chapter scroll scrub (Meridian), or brutalist zero-radius monochrome (Vertex). No glitch effects.

LAYOUT:

Single full-viewport hero (not multi-chapter scroll scrub). Fixed cold-glass navbar on top.

Top left: brand APEX with QUANTUM caption and a small cyan glowing pulse. Center links (hide on small phones): Platform, Research, Systems, Labs, Contact. Right: two pills "Documentation" (glass) and "Request Access" (cyan fill, void text).

Hero content left-aligned over the film:

- Badge: QUANTUM COMPUTING PLATFORM (uppercase, tracking wide, cyan)
 - H1: QUANTUM. (huge ice JetBrains Mono)
 - Lockup line: REAL. (violet)
 - Short body about error-corrected quantum systems and one stack of hardware, software, and control
 - Two CTAs: Access Quantum (cyan fill) and Read the Paper (glass outline)
- Safe side padding so type never clips. Soft staggered entrances only.

TECHNICAL (you the AI implement this, the human may not be a developer):

Use a modern web stack that works in the tool I am using. Prefer one main page section component. Video: muted, playsInline, autoPlay, loop, preload metadata, object-fit cover. IntersectionObserver to pause when off-screen. Framer Motion (or equivalent) for staggered entrance. Optional GSAP ScrollTrigger for light video scale parallax on desktop only. Support prefers-reduced-motion: no parallax, simple fade-in. Keep text readable with left-heavy void indigo gradients over the video. No Three.js required for v1.

QUALITY BAR:

It should feel like a serious quantum hardware launch page, not a generic AI particle toy. One clear system: looping cryogenic lab film + mono type + cyan instrument accent.

When done: I should see the full ApexQuantum experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium full-viewport website hero for a deep-tech quantum computing brand called APEX QUANTUM.

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/apex-quantum-v1.mp4>

If the user has a local file named apex-quantum-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Play it as a looping cinematic wallpaper (autoplay, muted, loop, playsInline). Do NOT use scroll-scrub timeline control.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name APEX QUANTUM to [YOUR BRAND NAME] everywhere in the design, including the top left."

Change the big headlines

Ask your AI: "Change QUANTUM. to [LINE 1] and REAL. to [LINE 2]. Keep huge JetBrains Mono and ice/violet split."

Change badge and body

Ask your AI: "Change the badge QUANTUM COMPUTING PLATFORM and the body paragraph to [YOUR COPY]. Keep left-aligned stack."

Change button labels

Ask your AI: "Rename Access Quantum to [PRIMARY] and Read the Paper to [SECONDARY]. Keep cyan primary and glass secondary pills."

Change colors

Ask your AI: "Swap cyan #00D4FF and violet #A855F7 to [ACCENT A] and [ACCENT B]. Keep void indigo canvas and readable contrast."

Use a different background video

Ask your AI: "Replace the background video with [YOUR VIDEO LINK OR FILE NAME]. Keep muted loop autoplay, not scroll scrub."

Make it work on phones

Ask your AI: "Improve the mobile layout so the headline never clips, nav center links hide, CTAs stack cleanly, and parallax is off under 768px."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep the Apex Quantum void/cyan deep-tech style. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic 4K seamless loop feel, silent, 24 frames per second. Empty cryogenic quantum laboratory or pure qubit light lattice, slow push, void indigo voids, electric cyan and controlled violet instrument light. No people, no faces, no readable text, no logos, no neon rain megacity. Deep-tech quantum prestige trailer look. Seamless loop.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same ApexQuantum layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
