

YOUR PRODUCT PACKAGE

NomadTravel

Luxury Travel Platform Hero

A warm terracotta luxury travel homepage with empty-destination cinema, Playfair type, and cream glass. Private-club aspiration, ready to build with your favorite AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/nomad-montage-v1.mp4>

Offline file name if you were given a file: nomad-montage-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the NomadTravel design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/nomad-montage-v1.mp4>

File name: nomad-montage-v1.mp4

What the film shows: a cinematic glide through extraordinary empty luxury destinations (cliff villa and infinity pool, desert lodge, or hidden jungle edge energy), warm terracotta and cream grade, espresso voids, slow prestige pace. About 30 seconds, silent, seamless loop feel. No people as heroes, no logos, no UI. Pack also includes poster still nomad-montage-v1.webp. If you have the files zip, client film lives under assets/ as nomad-montage-v1.mp4.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file nomad-montage-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport website hero for a luxury travel and private-stays brand called NOMAD TRAVEL.

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/nomad-montage-v1.mp4>

If the buyer has a local files pack, use assets/nomad-montage-v1.mp4 placed at public/assets/videos/nomad-montage-v1.mp4 (or the path already set in source).

Poster still (while loading / reduced motion still): public/assets/posters/nomad-montage-v1.webp (or

<https://www.ClickMotion.dev/assets/posters/nomad-montage-v1.webp>).

The video must be silent. It MUST free-play as a muted looping wallpaper (autoplay, muted, loop, playsInline). Scroll does NOT control video time. NEVER set video.currentTime from scroll. Optional desktop-only light scale parallax on the film WRAPPER only (scale about 1 to 1.06), never on the timeline.

LOOK AND FEEL:

Canvas espresso #1C140A. Cream type #FEF3C7. One terracotta accent #C17A4A.

Display headlines: Playfair Display (or equal elegant serif), weight 500-700, tracking about -0.03em, line-height about 0.9, size clamp roughly 3rem to 7.5rem.

Body and UI: Inter (or equal clean sans), 300-500, 15-16px, line-height about 1.7, cream at about 68 percent opacity.

Soft cream glass (cream about 8 percent + blur about 48px) for secondary controls. Full pills (radius 9999px).

Quiet, expensive, unhurried private travel club. Think Aman x Conde Nast Traveler launch craft, not backpacker, not neon cyberpunk, not cold fintech chrome, not spa-white wellness, not purple SaaS mesh, not multi-chapter scroll-scrub film products.

LAYOUT (exact structure):

Full viewport hero (100dvh / min-h 100dvh), overflow hidden, espresso canvas under the film.

Video absolute cover, object-fit cover, under content.

Dual gradients over the film so type stays legible: left espresso type field, bottom vignette, soft terracotta horizon glow. NEVER grey-wash the entire frame.

Fixed top nav: Compass mark (lucide Compass or equal) + NOMAD wordmark left; desktop center links Destinations, Stays, Journeys, Concierge, Journal; right: Sign in (glass pill) + Book a Stay (solid terracotta pill).

Content left column, max width about 44rem, vertically centered, safe horizontal padding at least about 2rem:

- Badge (uppercase micro): Curated luxury stays

- H1 huge cream Playfair: Go beyond.

- Accent line terracotta Playfair: Stay forever.

- Body: Curated luxury stays in the world's most extraordinary places. Private villas, cliffside hideaways, and journeys written for the few who never settle for ordinary.

- Dual CTAs: Explore Stays (solid terracotta) + Watch Journey (glass) with a small ArrowUpRight mark on primary if useful

- Quiet proof rail under a hairline border: 48 Countries · 120+ Private stays · 24/7 Concierge

Optional scroll cue on desktop only when motion is allowed. Hide center nav links under 768px. Stack CTAs on small screens. Disable film parallax under 768px.

MOTION (exact):

Staggered entrance fade/up with ease [0.25, 0.46, 0.45, 0.94] about 0.75s, order: badge, H1, accent, body, CTAs, stats.

Desktop only: GSAP ScrollTrigger scales the film wrap 1 to 1.06, scrub about 1.25, start top top, end bottom top. Film time stays free-play loop.

prefers-reduced-motion: opacity-only entrance, no parallax, hide scroll cue. Video may still play muted or show poster.

Cursor prompt (continued)

TECHNICAL (you the AI implement this; the human may not be a developer):

Prefer React + TypeScript + Tailwind with one drop-in component (NomadTravelHero). If a files pack is available, prefer integrating source/NomadTravelHero.tsx over rewriting.

Video attributes: muted, playsInline, autoPlay, loop, preload auto, object-fit cover, aria-hidden.

IntersectionObserver: pause when off-screen, play when visible.

Fonts: load Playfair Display + Inter with display swap. Prefer CSS variables --font-nomad-display and --font-nomad-body with system fallbacks.

Install when needed: framer-motion, gsap (+ ScrollTrigger), lucide-react.

Focus rings terracotta. Semantic section, header, nav, h1. Safe side padding so type never kisses the frame edge.

QUALITY BAR:

It should feel like a private travel club homepage in a Forbes / private-bank lifestyle register, not a generic AI vacation template. One clear system: free-play empty-destination cinema + cream editorial type + terracotta craft. Never scrub the film. Never burn storefront UI into the rebuild.

When done: I should see the full NomadTravel experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium full-viewport website hero for a luxury travel and private-stays brand called NOMAD TRAVEL.

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/nomad-montage-v1.mp4>

If the buyer has a local files pack, use `assets/nomad-montage-v1.mp4` placed at `public/assets/videos/nomad-montage-v1.mp4` (or the path already set in source).

Poster still (while loading / reduced motion still): `public/assets/posters/nomad-montage-v1.webp` (or

<https://www.ClickMotion.dev/assets/posters/nomad-montage-v1.webp>).

The video must be silent. It MUST free-play as a muted looping wallpaper (`autoplay`, `muted`, `loop`, `playsInline`). Scroll does NOT control video time. NEVER set `video.currentTime` from scroll. Optional desktop-only light scale parallax on the film WRAPPER only (scale about 1 to 1.06), never on the timeline.

Fixed top nav: Compass mark (lucide Compass or equal) + NOMAD wordmark left; desktop center links Destinations, Stays, Journeys, Concierge, Journal; right: Sign in (glass pill) + Book a Stay (solid terracotta pill).

Content left column, max width about 44rem, vertically centered, safe horizontal padding at least about 2rem:

- Badge (uppercase micro): Curated luxury stays

- H1 huge cream Playfair: Go beyond.

- Accent line terracotta Playfair: Stay forever.

- Body: Curated luxury stays in the world's most extraordinary places. Private villas, cliffside hideaways, and journeys written for the few who never settle for ordinary.

- Dual CTAs: Explore Stays (solid terracotta) + Watch Journey (glass) with a small ArrowUpRight mark on primary if useful

- Quiet proof rail under a hairline border: 48 Countries · 120+ Private stays · 24/7 Concierge

Optional scroll cue on desktop only when motion is allowed. Hide center nav links under 768px. Stack CTAs on small screens. Disable film parallax under 768px.

MOTION (exact):

Staggered entrance fade/up with ease [0.25, 0.46, 0.45, 0.94] about 0.75s, order: badge, H1, accent, body, CTAs, stats.

Desktop only: GSAP ScrollTrigger scales the film wrap 1 to 1.06, scrub about 1.25, start top top, end bottom top. Film time stays free-play loop.

prefers-reduced-motion: opacity-only entrance, no parallax, hide scroll cue. Video may still play muted or show poster.

Bolt prompt (continued)

TECHNICAL (you the AI implement this; the human may not be a developer):

Prefer React + TypeScript + Tailwind with one drop-in component (NomadTravelHero). If a files pack is available, prefer integrating source/NomadTravelHero.tsx over rewriting.

Video attributes: muted, playsInline, autoPlay, loop, preload auto, object-fit cover, aria-hidden.

IntersectionObserver: pause when off-screen, play when visible.

Fonts: load Playfair Display + Inter with display swap. Prefer CSS variables --font-nomad-display and --font-nomad-body with system fallbacks.

Install when needed: framer-motion, gsap (+ ScrollTrigger), lucide-react.

Focus rings terracotta. Semantic section, header, nav, h1. Safe side padding so type never kisses the frame edge.

QUALITY BAR:

It should feel like a private travel club homepage in a Forbes / private-bank lifestyle register, not a generic AI vacation template. One clear system: free-play empty-destination cinema + cream editorial type + terracotta craft. Never scrub the film. Never burn storefront UI into the rebuild.

When done: I should see the full NomadTravel experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Your Smart AI Agent

Select everything in the box area below (all parts if more than one page). Copy, then paste into Your Smart AI Agent. You do not need to understand the technical lines. Your AI does.

You are my smart AI agent. I may not be a professional programmer. Build a complete, production-ready website hero from the brief below. You choose the stack that works in my environment, create every file, wire the background video, and deliver a polished preview. Do not leave steps for me that require writing code. When finished, explain in plain English how I view and share the result.

Build a premium full-viewport website hero for a luxury travel and private-stays brand called NOMAD TRAVEL.

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/nomad-montage-v1.mp4>

If the buyer has a local files pack, use assets/nomad-montage-v1.mp4 placed at public/assets/videos/nomad-montage-v1.mp4 (or the path already set in source).

Poster still (while loading / reduced motion still): public/assets/posters/nomad-montage-v1.webp (or

<https://www.ClickMotion.dev/assets/posters/nomad-montage-v1.webp>).

The video must be silent. It MUST free-play as a muted looping wallpaper (autoPlay, muted, loop, playsInline). Scroll does NOT control video time. NEVER set video.currentTime from scroll. Optional desktop-only light scale parallax on the film WRAPPER only (scale about 1 to 1.06), never on the timeline.

LOOK AND FEEL:

Canvas espresso #1C140A. Cream type #FEF3C7. One terracotta accent #C17A4A.

Display headlines: Playfair Display (or equal elegant serif), weight 500-700, tracking about -0.03em, line-height about 0.9, size clamp roughly 3rem to 7.5rem.

Body and UI: Inter (or equal clean sans), 300-500, 15-16px, line-height about 1.7, cream at about 68 percent opacity.

Soft cream glass (cream about 8 percent + blur about 48px) for secondary controls. Full pills (radius 9999px).

Quiet, expensive, unhurried private travel club. Think Aman x Conde Nast Traveler launch craft, not backpacker, not neon cyberpunk, not cold fintech chrome, not spa-white wellness, not purple SaaS mesh, not multi-chapter scroll-scrub film products.

LAYOUT (exact structure):

Full viewport hero (100dvh / min-h 100dvh), overflow hidden, espresso canvas under the film.

Video absolute cover, object-fit cover, under content.

Dual gradients over the film so type stays legible: left espresso type field, bottom vignette, soft terracotta horizon glow. NEVER grey-wash the entire frame.

Fixed top nav: Compass mark (lucide Compass or equal) + NOMAD wordmark left; desktop center links Destinations, Stays, Journeys, Concierge, Journal; right: Sign in (glass pill) + Book a Stay (solid terracotta pill).

Content left column, max width about 44rem, vertically centered, safe horizontal padding at least about 2rem:

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name NOMAD to [YOUR BRAND NAME] everywhere in the design, including the top left wordmark and any aria labels."

Change the big headlines

Ask your AI: "Change Go beyond. to [LINE 1] and Stay forever. to [LINE 2]. Keep huge Playfair, cream H1, and terracotta accent line."

Change badge and body

Ask your AI: "Change the badge Curated luxury stays and the body paragraph to [YOUR COPY]. Keep left-aligned editorial stack and cream readability."

Change button labels

Ask your AI: "Rename Explore Stays to [PRIMARY] and Watch Journey to [SECONDARY]. Also rename Sign in and Book a Stay if needed. Keep terracotta primary and glass secondary pills."

Change nav links and stats

Ask your AI: "Replace nav links Destinations, Stays, Journeys, Concierge, Journal with [MY FIVE LINKS]. Change the three proof stats to [A], [B], [C]. Keep three max."

Change colors

Ask your AI: "Keep a warm luxury travel look. Change canvas #1C140A, cream #FEF3C7, and terracotta #C17A4A to [CANVAS], [CREAM], [ACCENT]. Keep readable cream-on-dark contrast. No cyan or neon primary system."

Use a different background video

Ask your AI: "Replace the background video with [YOUR VIDEO LINK OR FILE NAME] and update the poster still. Keep muted loop autoplay, object-fit cover, and type-legibility gradients. Never scrub video.currentTime with scroll."

Change fonts or mark

Ask your AI: "Load my display serif as --font-nomad-display and my UI sans as --font-nomad-body. Swap the Compass icon for [MY MARK]. Keep large display H1 scale."

Make it work on phones

Ask your AI: "Improve the mobile layout so the headline never clips, center nav links hide under 768px, CTAs stack cleanly, safe padding stays at least 2rem, and film parallax is off under 768px."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep free-play muted film loop, soft entrance, desktop film parallax only, and the Nomad Travel espresso/terracotta luxury style. Do not scrub video.currentTime. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic ultra-premium 4K seamless loop, 14 to 30 seconds, 24fps film feel, no audio. SUBJECT: Empty luxury travel destinations from one coherent high-end cinema language. Primary: slow aerial or elevated glide over a cliffside luxury villa and infinity pool at golden hour, warm terracotta stone, cream limestone, deep espresso rock voids, turquoise or ink-blue water far below, soft haze. Alt A: empty desert boutique lodge at magic hour. Alt B: misty jungle canopy toward a hidden infinity edge. CAMERA: continuous slow aerial or elevated dolly, locked horizon, one smooth move only. No cuts, whip pans, handheld chaos, snap zooms, or FPV freestyle. LOOK: warm luxury editorial grade (espresso voids, terracotta highlights, cream sun-kissed limestone), gentle film grain. Aman resort brand film meets Conde Nast Traveler opening shot. Not teal-orange blockbuster cliché, not neon cyberpunk, not cold blue fintech chrome, not white wellness spa. FORBIDDEN: people or faces as focus; readable text, logos, watermarks, hotel brands, UI, HUD, map pins; backpacker energy; overcrowded tourist beaches as hero subject. TECH: 16:9, 3840x2160 preferred or 1920x1080 minimum, silent, photoreal cinematic. Seamless loop: end frame compositionally matches start. After export: save as public/assets/videos/nomad-montage-v1.mp4, export a poster still to public/assets/posters/nomad-montage-v1.webp, keep muted loop autoplay, never scrub video.currentTime with scroll, keep type-legibility gradients (do not grey-wash the frame).

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same NomadTravel layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
