

YOUR PRODUCT PACKAGE

Prism

Liquid Glass Multi-Panel Identity Hero

A creative identity homepage where scroll aims a 48-second multi-face film and the picture never jumps a frame. Liquid glass on both sides, ready for your AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

Offline file name if you were given a file: prism-faces-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Prism design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

File name: prism-faces-v1.mp4

What the film shows: a centered multi-face identity sculpture on soft cool-gray studio mist - stone, porcelain, and painted spectra morph and fragment, always centered with empty left and right thirds. 47.63 seconds, silent. H.264 GOP 3, no B-frames, 24fps, 1143 frames, 381 I-frames, about 126 MB. No readable text or UI. Pack also includes poster still prism-faces-v1.webp. If you have the files zip, client film lives under assets/ as prism-faces-v1.mp4.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file prism-faces-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport website hero for a creative identity studio called PRISM.

BACKGROUND VIDEO (required):

Use this video as the full-screen film under the hero (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

If the buyer has a local files pack, use assets/prism-faces-v1.mp4 placed at public/assets/videos/prism-faces-v1.mp4 (or the path already set in source).

Poster still (while loading / reduced motion still): public/assets/posters/prism-faces-v1.webp (or

<https://www.ClickMotion.dev/assets/posters/prism-faces-v1.webp>).

The video must be silent. Dual process: PSAVE (Perfect Scroll Video Engine) plus No Scroller (pin-until-complete). NOT wallpaper-only. NOT GSAP ScrollTrigger seek-scrub. NOT a tall 520vh sticky track.

PSAVE + NO SCROLLER (non-negotiable):

One pinned 100dvh stage in normal document flow. The page does NOT physically scroll during the journey. Do not use position sticky. Do not build a 520vh spacer. Do not overflow-hidden the host page.

VIRTUAL_VIEWPORTS = 12 (locked: 47.63s even faces; two flicks on 3.6 dump dest). PSAVE_RATE = 1.2. PSAVE_FRAME = 1/24.

PSAVE_REV_STRIDE = 3. PSAVE_LIVE_MS = 280. PSAVE_COAST_SEC = 0.55. PSAVE_EASE_SEC = 0.55.

PSAVE_FLIP_DEADZONE_PX = 32.

Scroll aims a destination 0-1 on the 12 viewport track (raw 1:1, no wheel gain). The film PLAYS to that destination. Never seek currentTime across a jump.

DOWN: muted native play() at playbackRate 1.2. After they lift, leftover dest plus a 0.55s dest floor keeps the film going a little, then rate eases toward about 0.42. Friction, then a graceful stop. Ignore tiny opposite trackpad ticks under 32px.

UP: first real up-scroll snaps dest onto the picture. Walk currentTime backward exactly one 3-frame step (0.125s) per seek. Wait seeked. Never seek to the stop point.

Glass panels, moment pill (Atelier / Proof / Invite), and the violet bar follow the PICTURE (currentTime / duration), not the wheel target.

Release the pin only when the picture arrives at 0 (up) or 1 (down). Then the dark #atelier band may scroll in.

Opening: kick-sseek 0.04 to 0, wait seeked.

prefers-reduced-motion: still composition at playhead 0.42. No PSAVE.

Do NOT install gsap. Do NOT import ScrollTrigger. Do NOT restore a 520vh sticky track or seek-scrub 0.55.

LOOK AND FEEL:

Soft studio mist canvas #E8EAEF. Ink #0E1016. Prism violet #A78BFA, soft violet #C4B5FD, cyan #67E8F9, fuchsia #F0ABFC.

Display: Syne 600-700. Body: DM Sans 400-600, 11-14px.

White type on liquid glass with a soft text-shadow. Gallery installation, not glassmorphism wallpaper, not a left-only scroll essay, not Meridian estate, not Revel pearl fashion, not Vertex mono security.

LIQUID GLASS (mandatory - not cheap single blur):

1) SVG filters once: #glass-distortion (Ice Ripple, seed 92, scale 65) and #glass-distortion-mercury (deeper, scale 120).

2) Host isolation + outer glow. FX layer: frost blur + saturate + distortion. Dual reflection washes. Stabilized content plate.

3) Tiers: silk (chips/metrics), ice (standard), mercury (features/quotes/CTA, deeper refraction).

4) prefers-reduced-transparency: solid elevated dark plates, same layout.

LAYOUT LAW (critical - anti left-only trap):

Do NOT put all copy in a left column only.

Float MANY liquid glass panels of DIFFERENT sizes on BOTH left AND right. Keep center faces sacred.

Kinds: chip, metric, stat, profile, quote, feature, CTA. Stagger tops from about 15% to 80%.

Cursor prompt (continued)

Top: PRISM wordmark + Identity studio, nav Work Approach Atelier Journal, Book intro glass pill.
 Progress hairline under nav: violet to fuchsia to cyan, scaleX from PLAYHEAD.
 Top-center moment pill: Atelier (0-0.34) / Proof (0.34-0.66) / Invite (0.66-1).
 Mobile under 640px: hide the multi-panel field; one mercury strip at the bottom with the active act.
 After the picture arrives, a dark #atelier band (#0E1016): Prism Atelier, "Identity for brands / with many faces.", Book a studio intro + View selected work.

DEFAULT PANELS (exact starting board):

Atelier: Now booking; 48 Brands shaped; Identity studio / Your brand has more than one face.; 12 Cities.
 Proof: They saw every side of us.; Iris Vale / Creative Director; Spring drop live; Awwwards jury; 94% Client return; What we ship / Systems, not one-offs.
 Invite: 9 Years open; Next season / Bring your story into the light.; Quiet confidence.; Start a project / Book a studio intro / Request a slot; NYC remote; 6 wk Avg. kickoff.

MOTION (exact):

PSAVE chase on requestAnimationFrame. No GSAP. No ScrollTrigger.
 Panel opacity and 36px side enter from playhead (fade about 0.045).
 Progress bar scaleX every tick via ref.
 Capture helper: window.__msScrollNarrative = { setProgress, getProgress, getTarget, productId: "MS-HERO-PRSM01" }. Root data-prism-drive="psave".

TECHNICAL (you the AI implement this; the human may not be a developer):

Prefer React + TypeScript + Tailwind with one drop-in component (PrismLiquidGlass). If a files pack is available, prefer integrating source/PrismLiquidGlass.tsx over rewriting.
 Video attributes: muted, playsInline, preload auto, object-fit cover, aria-hidden. No loop as primary mode.
 Fonts: load Syne + DM Sans with display swap. Prefer CSS variables --font-prism-display and --font-prism-sans with system fallbacks.
 Do NOT install gsap.
 Focus rings violet. Semantic header, nav, section. Safe side insets so glass never kisses the frame edge.
 Replacement films MUST be re-encoded GOP 3, no B-frames, crf 16 (ffmpeg -g 3 -keyint_min 3 -bf 0). A long-GOP file stalls mid-reverse.

QUALITY BAR:

It should feel like a Forbes-class identity studio homepage - gallery, inevitable, expensive. One clear system: dual process PSAVE plus No Scroller. Never jump a frame. Never restore 520vh GSAP scrub. Never burn storefront UI into the rebuild. Never collapse to a left-column-only essay.

When done: I should see the full Prism experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Select everything in the box area below (all parts if more than one page). Copy, then paste into Codex / ChatGPT. You do not need to understand the technical lines. Your AI does.

You are Codex / ChatGPT acting as my coding agent. Build a complete, production-ready web section or page. Create clear files, install what you need, and leave me a working result. Explain briefly what you built in plain language when finished.

Build a premium full-viewport website hero for a creative identity studio called PRISM.

BACKGROUND VIDEO (required):

Use this video as the full-screen film under the hero (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/prism-faces-v1.mp4>

If the buyer has a local files pack, use assets/prism-faces-v1.mp4 placed at public/assets/videos/prism-faces-v1.mp4 (or the path already set in source).

Poster still (while loading / reduced motion still): public/assets/posters/prism-faces-v1.webp (or

<https://www.ClickMotion.dev/assets/posters/prism-faces-v1.webp>).

The video must be silent. Dual process: PSAVE (Perfect Scroll Video Engine) plus No Scroller (pin-until-complete). NOT wallpaper-only.

NOT GSAP ScrollTrigger seek-scrub. NOT a tall 520vh sticky track.

PSAVE + NO SCROLLER (non-negotiable):

One pinned 100dvh stage in normal document flow. The page does NOT physically scroll during the journey. Do not use position sticky.

Do not build a 520vh spacer. Do not overflow-hidden the host page.

VIRTUAL_VIEWPORTS = 12 (locked: 47.63s even faces; two flicks on 3.6 dump dest). PSAVE_RATE = 1.2. PSAVE_FRAME = 1/24.

PSAVE_REV_STRIDE = 3. PSAVE_LIVE_MS = 280. PSAVE_COAST_SEC = 0.55. PSAVE_EASE_SEC = 0.55.

PSAVE_FLIP_DEADZONE_PX = 32.

Scroll aims a destination 0-1 on the 12 viewport track (raw 1:1, no wheel gain). The film PLAYS to that destination. Never seek currentTime across a jump.

DOWN: muted native play() at playbackRate 1.2. After they lift, leftover dest plus a 0.55s dest floor keeps the film going a little, then rate eases toward about 0.42. Friction, then a graceful stop. Ignore tiny opposite trackpad ticks under 32px.

UP: first real up-scroll snaps dest onto the picture. Walk currentTime backward exactly one 3-frame step (0.125s) per seek. Wait seeked. Never seek to the stop point.

Glass panels, moment pill (Atelier / Proof / Invite), and the violet bar follow the PICTURE (currentTime / duration), not the wheel target.

Release the pin only when the picture arrives at 0 (up) or 1 (down). Then the dark #atelier band may scroll in.

Opening: kick-seek 0.04 to 0, wait seeked.

prefers-reduced-motion: still composition at playhead 0.42. No PSAVE.

Do NOT install gsap. Do NOT import ScrollTrigger. Do NOT restore a 520vh sticky track or seek-scrub 0.55.

LOOK AND FEEL:

Soft studio mist canvas #E8EAEF. Ink #0E1016. Prism violet #A78BFA, soft violet #C4B5FD, cyan #67E8F9, fuchsia #F0ABFC.

Display: Syne 600-700. Body: DM Sans 400-600, 11-14px.

White type on liquid glass with a soft text-shadow. Gallery installation, not glassmorphism wallpaper, not a left-only scroll essay, not Meridian estate, not Revel pearl fashion, not Vertex mono security.

LIQUID GLASS (mandatory - not cheap single blur):

1) SVG filters once: #glass-distortion (Ice Ripple, seed 92, scale 65) and #glass-distortion-mercury (deeper, scale 120).

2) Host isolation + outer glow. FX layer: frost blur + saturate + distortion. Dual reflection washes. Stabilized content plate.

3) Tiers: silk (chips/metrics), ice (standard), mercury (features/quotes/CTA, deeper refraction).

4) prefers-reduced-transparency: solid elevated dark plates, same layout.

LAYOUT LAW (critical - anti left-only trap):

Do NOT put all copy in a left column only.

Float MANY liquid glass panels of DIFFERENT sizes on BOTH left AND right. Keep center faces sacred.

Codex / ChatGPT prompt (continued)

Kinds: chip, metric, stat, profile, quote, feature, CTA. Stagger tops from about 15% to 80%.
 Top: PRISM wordmark + Identity studio, nav Work Approach Atelier Journal, Book intro glass pill.
 Progress hairline under nav: violet to fuchsia to cyan, scaleX from PLAYHEAD.
 Top-center moment pill: Atelier (0-0.34) / Proof (0.34-0.66) / Invite (0.66-1).
 Mobile under 640px: hide the multi-panel field; one mercury strip at the bottom with the active act.
 After the picture arrives, a dark #atelier band (#0E1016): Prism Atelier, "Identity for brands / with many faces.", Book a studio intro + View selected work.

DEFAULT PANELS (exact starting board):

Atelier: Now booking; 48 Brands shaped; Identity studio / Your brand has more than one face.; 12 Cities.
 Proof: They saw every side of us.; Iris Vale / Creative Director; Spring drop live; Awwwards jury; 94% Client return; What we ship / Systems, not one-offs.
 Invite: 9 Years open; Next season / Bring your story into the light.; Quiet confidence.; Start a project / Book a studio intro / Request a slot; NYC remote; 6 wk Avg. kickoff.

MOTION (exact):

PSAVE chase on requestAnimationFrame. No GSAP. No ScrollTrigger.
 Panel opacity and 36px side enter from playhead (fade about 0.045).
 Progress bar scaleX every tick via ref.
 Capture helper: window.__msScrollNarrative = { setProgress, getProgress, getTarget, productId: "MS-HERO-PRSM01" }. Root data-prism-drive="psave".

TECHNICAL (you the AI implement this; the human may not be a developer):

Prefer React + TypeScript + Tailwind with one drop-in component (PrismLiquidGlass). If a files pack is available, prefer integrating source/PrismLiquidGlass.tsx over rewriting.
 Video attributes: muted, playsInline, preload auto, object-fit cover, aria-hidden. No loop as primary mode.
 Fonts: load Syne + DM Sans with display swap. Prefer CSS variables --font-prism-display and --font-prism-sans with system fallbacks.
 Do NOT install gsap.
 Focus rings violet. Semantic header, nav, section. Safe side insets so glass never kisses the frame edge.
 Replacement films MUST be re-encoded GOP 3, no B-frames, crf 16 (ffmpeg -g 3 -keyint_min 3 -bf 0). A long-GOP file stalls mid-reverse.

QUALITY BAR:

It should feel like a Forbes-class identity studio homepage - gallery, inevitable, expensive. One clear system: dual process PSAVE plus No Scroller. Never jump a frame. Never restore 520vh GSAP scrub. Never burn storefront UI into the rebuild. Never collapse to a left-column-only essay.

When done: I should see the full Prism experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Bolt

Select everything in the box area below (all parts if more than one page). Copy, then paste into Bolt. You do not need to understand the technical lines. Your AI does.

Build this as a complete page in Bolt. I am not a professional programmer. You handle all technical setup, libraries, and layout. Show me a working preview.

Build a premium full-viewport website hero for a creative identity studio called PRISM.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name PRISM to [YOUR BRAND NAME] everywhere, including the top left wordmark. Update Identity studio to [MY KICKER]."

Rewrite the glass panels

Ask your AI: "Rewrite all glass panel titles, bodies, metrics, quotes, and the CTA for [MY IDENTITY STUDIO]. Keep three playhead acts Atelier / Proof / Invite and panels on BOTH sides. Do not collapse to a left column."

Change nav and atelier CTAs

Ask your AI: "Replace nav links Work, Approach, Atelier, Journal with [MY FOUR LINKS]. Rename Book intro, Book a studio intro, View selected work, and Request a slot to [MY LABELS]. Keep glass pills."

Change metrics

Ask your AI: "Change 48 Brands shaped, 12 Cities, 94% Client return, 9 Years open, and 6 wk Avg. kickoff to [MY METRICS]. Keep them as small silk/ice panels on both sides."

Change colors

Ask your AI: "Keep a studio-mist identity look. Change canvas #E8EAEF, violet #A78BFA, and cyan #67E8F9 to [CANVAS], [VIOLET], [CYAN]. Keep readable white type on darkened glass plates. No neon primary system."

Use a different background video

Ask your AI: "Replace the hero film with [YOUR VIDEO LINK OR FILE NAME]. Re-encode GOP 3, no B-frames, crf 16 first. Update the poster still. Keep PSAVE: 12 viewport aim, 1.2x forward, reverse every 3rd frame, leftover dest plus 0.55s dest floor, both-side glass, center subject clear. Never wallpaper-only. Never GSAP scrub."

Change fonts

Ask your AI: "Load my geometric display as --font-prism-display and my UI sans as --font-prism-sans. Keep tight wordmark tracking and readable 13px panel body."

Make it work on phones

Ask your AI: "Improve the mobile layout so the multi-panel field hides under 640px, one mercury strip sits at the bottom with the active act, Book intro stays reachable, and the stage stays one pinned viewport. Dual process must still hold: page does not physically scroll during the journey."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep dual process PSAVE plus No Scroller (12 vh aim, 1.2x forward, reverse every 3rd frame, leftover dest plus 0.55s dest floor), both-side liquid glass, and full film duration. Do not restore gsap, a 520vh sticky track, or a left-column-only layout. Do not reduce to wallpaper-only. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic ultra-premium 4K continuous sculpture study, 24 to 50 seconds, 24fps, silent. SUBJECT: centered multi-face identity sculpture that morphs and fragments (stone, porcelain, iridescent paint). Empty left and right thirds for glass. Soft cool-gray studio mist. ARC: quiet stone faces, then fracture and color, then whole again. EVEN time, not a late kick. CAMERA: slow locked-horizon orbit or gentle push. Gallery pace. LOOK: studio mist, violet and cyan edge light, cream specular, gentle film grain. FORBIDDEN: logos, UI, captions, watermarks, left-locked single portrait that fills the frame, jump cuts. TECH: 16:9, 3840x2160 preferred or 1920x1080 min, silent. After export RE-ENCODE GOP 3 no B-frames: `ffmpeg -y -i your-film.mp4 -an -c:v libx264 -pix_fmt yuv420p -preset slow -crf 16 -g 3 -keyint_min 3 -bf 0 -sc_threshold 0 -movflags +faststart prism-faces-v1.mp4`. Save as `public/assets/videos/prism-faces-v1.mp4`, poster to `public/assets/posters/prism-faces-v1.webp`. Keep PSAVE (12 vh aim, 1.2x forward, reverse every 3rd frame, leftover dest plus 0.55s dest floor). Never wallpaper-only. Never GSAP scrub.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Prism layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
