

YOUR PRODUCT PACKAGE

SkySpires

Sunrise Scroll Hero

A sunrise design-studio homepage where scroll aims a 25-second film and the picture never jumps a frame. Frost HUD stays alive, ready for your AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/skyspires-sunrise-v1.mp4>

Offline file name if you were given a file: skyspires-sunrise-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the SkySpires design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/skyspires-sunrise-v1.mp4>

File name: skyspires-sunrise-v1.mp4

What the film shows: cinematic sunrise / sky architecture, 25.04 seconds, silent. H.264 GOP 3, no B-frames, 24fps, 201 I-frames, 400 P, 0 B, about 18 MB. No readable text or UI. Pack includes poster still skyspires-sunrise-v1.webp.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file skyspires-sunrise-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport website hero for a design studio called SkySpires.

BACKGROUND VIDEO (required):

Use this video as the full-screen sunrise film under the hero (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/skyspires-sunrise-v1.mp4>

If the buyer has a local files pack, use assets/skyspires-sunrise-v1.mp4 placed at public/assets/videos/skyspires-sunrise-v1.mp4.

Poster: public/assets/posters/skyspires-sunrise-v1.webp.

The video must be silent. Dual process: PSAVE (Perfect Scroll Video Engine) plus No Scroller (pin-until-complete). The WHOLE film plays on scroll. HUD loops stay. NOT wallpaper-only. NOT Nexora.

PSAVE + NO SCROLLER:

One pinned 100dvh stage in normal document flow. The page does NOT physically scroll during the journey.

VIRTUAL_VIEWPORTS = 12 (25.04s even sunrise). PSAVE_RATE = 1.2. PSAVE_FRAME = 1/24. PSAVE_REV_STRIDE = 3.

PSAVE_LIVE_MS = 280. PSAVE_COAST_SEC = 0.55. PSAVE_EASE_SEC = 0.55. PSAVE_FLIP_DEADZONE_PX = 32.

Scroll aims destination. Film PLAYS to that destination. Never seek currentTime across a jump.

HUD CSS/interval loops stay: CTA 12.5s, dock sheen 6.4s, dock gold 12s, stats 10s then gauge, rings 2.8s, CDMX clock 15s.

Do NOT retune .lg-fill or .lg-spec on dock, CTA, Log In, or stats.

Release only when the picture arrives at 0 or 1. Then the page owns until dock (top >= -2).

Do NOT install gsap. Do NOT restore filament, colored step boxes, purple S, or Lab · hero.

LOOK AND FEEL:

Editorial frost on cinematic sunrise. Ink #f7f3ec. Gold #e8c48a / edge #f6e2a8. Peach #f0b090. Violet #8b7cff.

Display: Playfair Display 500 italic on limits. Body: Outfit 300-500.

Wordmark SKYSPIRES, no S icon. Nav: Home, About, Process (chevron), Community, News, Students, Contact. Log In right = stats right (~sky-right 3.2%).

QUALITY BAR:

Forbes-class design-studio homepage. Dual process PSAVE plus No Scroller. The whole film plays. HUD never freezes. Never restore Nexora or filament.

When done: I should see the full SkySpires experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium full-viewport website hero for a design studio called SkySpires.

BACKGROUND VIDEO (required):

Use this video as the full-screen sunrise film under the hero (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/skyspires-sunrise-v1.mp4>

If the buyer has a local files pack, use assets/skyspires-sunrise-v1.mp4 placed at public/assets/videos/skyspires-sunrise-v1.mp4.

Poster: public/assets/posters/skyspires-sunrise-v1.webp.

The video must be silent. Dual process: PSAVE (Perfect Scroll Video Engine) plus No Scroller (pin-until-complete). The WHOLE film plays on scroll. HUD loops stay. NOT wallpaper-only. NOT Nexora.

PSAVE + NO SCROLLER:

One pinned 100dvh stage in normal document flow. The page does NOT physically scroll during the journey.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change SkySpires to [YOUR BRAND NAME] everywhere, including the top left wordmark."

Rewrite headlines

Ask your AI: "Update Design / without / limits., the kicker, and the body for [MY STUDIO]. Keep the italic gradient on the last word. No Nexora."

Change nav and CTAs

Ask your AI: "Replace nav links and rename Start Your Project / See Case Studies / Sign Up / Log In to [MY LABELS]. Keep the chevron on the Process-equivalent item only."

Change colors

Ask your AI: "Keep frost glass. Change ink, gold, and peach/violet accents to [INK], [GOLD], [ACCENT]. Do not retune .lg-fill or .lg-spec on dock, CTA, Log In, or stats."

Use a different background video

Ask your AI: "Replace the hero film with [YOUR FILE]. Re-encode GOP 3, no B-frames, 24fps, crf 18 first. Keep PSAVE 12 vh. The whole film must play."

Make it work on phones

Ask your AI: "Hide center nav and stats under 820px, keep the dock readable, keep one pinned viewport. Dual process must still hold."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE]. Keep dual process PSAVE plus No Scroller, frost HUD, and full film duration. Do not restore filament, gsap, or Nexora. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic ultra-premium 4K continuous sunrise, 20 to 30 seconds, 24fps, silent. Sky architecture at first light. Warm cloud, gold rim, peach haze. EVEN time. FORBIDDEN: logos, UI, captions, watermarks, Nexora wordmark. RE-ENCODE GOP 3 no B-frames crf 18 24fps then wire as skyspires-sunrise-v1.mp4. Keep PSAVE 12 vh, 1.2x, reverse every 3rd frame, leftover dest plus 0.55s dest floor.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same SkySpires layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
