

YOUR PRODUCT PACKAGE

Still

Mindfulness Scroll Narrative Hero

A night-sky mindfulness homepage where scroll aims a 30-second cosmic film and the picture never jumps a frame. Five soft chapters, mint craft, ready for your AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/still-cosmos-v1.mp4>

Offline file name if you were given a file: still-cosmos-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Still design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/still-cosmos-v1.mp4>

File name: still-cosmos-v1.mp4

What the film shows: a continuous cosmic growth journey - arid desert under planets, soft greening, then lush emerald cosmos with mint-teal planet light. 30 seconds, silent. H.264 GOP 3, no B-frames, 24fps, 720 frames, 240 I-frames, about 82 MB. Optional distant figure, never as a logo. No readable text or UI. Pack also includes poster still still-cosmos-v1.webp. If you have the files zip, client film lives under assets/ as still-cosmos-v1.mp4.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file still-cosmos-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport website hero for a mindfulness and mental wellness brand called STILL.

BACKGROUND VIDEO (required):

Use this video as the full-screen film under the hero (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/still-cosmos-v1.mp4>

If the buyer has a local files pack, use assets/still-cosmos-v1.mp4 placed at public/assets/videos/still-cosmos-v1.mp4 (or the path already set in source).

Poster still (while loading / reduced motion still): public/assets/posters/still-cosmos-v1.webp (or

<https://www.ClickMotion.dev/assets/posters/still-cosmos-v1.webp>).

The video must be silent. Dual process: PSAVE (Perfect Scroll Video Engine) plus No Scroller (pin-until-complete). NOT wallpaper-only. NOT hybrid idle free-play. NOT a tall 960vh sticky track.

PSAVE + NO SCROLLER (non-negotiable):

One pinned 100dvh stage in normal document flow. The page does NOT physically scroll during the journey. Do not use position sticky. Do not build a 960vh spacer. Do not overflow-hidden the host page.

VIRTUAL_VIEWPORTS = 12 (locked: 30s even cosmos; two flicks on 3.6 dump dest). PSAVE_RATE = 1.2. PSAVE_FRAME = 1/24.

PSAVE_REV_STRIDE = 3. PSAVE_LIVE_MS = 280. PSAVE_COAST_SEC = 0.55. PSAVE_EASE_SEC = 0.55.

PSAVE_FLIP_DEADZONE_PX = 32.

Scroll aims a destination 0-1 on the 12 viewport track (raw 1:1, no wheel gain). The film PLAYS to that destination. Never seek currentTime across a jump.

DOWN: muted native play() at playbackRate 1.2. After they lift, leftover dest plus a 0.55s dest floor keeps the film going a little, then rate eases toward about 0.42. Friction, then a graceful stop. Ignore tiny opposite trackpad ticks under 32px.

UP: first real up-scroll snaps dest onto the picture. Walk currentTime backward exactly one 3-frame step (0.125s) per seek. Wait seeked. Never seek to the stop point.

Copy, five chapters, whispers, and the mint bar follow the PICTURE (currentTime / duration), not the wheel target.

Release the pin only when the picture arrives at 0 (up) or 1 (down). Then the host page may continue.

Opening: kick-seek 0.04 to 0, wait seeked, fade the film in.

prefers-reduced-motion: still frame at t=0 + chapter 1 only. No PSAVE.

Do NOT install gsap. Do NOT import ScrollTrigger. Do NOT restore STILL_IDLE_MS, TRACK_VH, a mode chip, or hybrid Option A.

LOOK AND FEEL:

Canvas deep night #070b12. Moon cream type #eef6f4. One mint accent #8fd0c8. Sparing soft violet #c5b8e0 on the progress gradient end only.

Display headlines: Cormorant Garamond or Playfair Display, medium weight, tracking about -0.02em, line-height about 0.94, size clamp roughly 2.6rem to 5.75rem.

Body and UI: Inter 300-500, 15-16px, cream about 72 percent opacity.

Quiet mindfulness prestige. Calm and Headspace craft language with cosmic prestige film. Not clinical white spa, not neon SaaS, not purple mesh, not Meridian estate scrub, not Elyse gold earth, not Revel pearl fashion.

LAYOUT (exact structure):

One pinned 100dvh stage, night canvas under the film. No tall spacer.

Video absolute cover, object-fit cover, under content. No intentional CSS zoom or blur on the film. No center breath circle covering the cosmos.

Dual edge scrim only (left type field + bottom vignette) so type stays legible while the center film stays clean. NEVER grey-wash the entire frame.

Top header: STILL wordmark left; desktop nav Practice, Sleep, Stress, Retreats; right Sign in (glass) + Begin free (mint solid).

Cursor prompt (continued)

Mint-to-violet progress hairline under the header (transform scaleX from PLAYHEAD, origin left, driven every tick via DOM ref).

NO mode chip. Do not add "Scroll to guide" or "Breathing with you".

Floating whisper words (one per chapter): Breathe in, Unclench, Ease, Expand, Return - soft mint when active.

Bottom content: chapter eyebrow, two-line display H1, body. Right-side chapter markers 01-05 on desktop.

Five chapters mapped to playhead bands 0-0.14, 0.14-0.34, 0.34-0.56, 0.56-0.78, 0.78-1.01:

- 1) Soften. / Begin again. - private practice for a louder world
 - 2) When your mind / never lands. - short sessions, no judgment
 - 3) Softness / is a skill. - evidence-backed minutes that hold you
 - 4) Grow into / your quiet. - daily calm and night rest
 - 5) Come home / to yourself. - feeling and benefits: quieter body, clearer mornings, restorative sleep. Dual CTAs Start free session + Explore programs. Three quiet stats: 10 min daily sessions, Science led programs, Live retreats and circles.
- Safe horizontal padding at least about 2rem. Hide center nav under 768px. Stack CTAs on small screens.

MOTION (exact):

PSAVE chase on requestAnimationFrame. No GSAP. No ScrollTrigger.

Chapter crossfade about 0.75s cubic-bezier(0.22, 0.61, 0.36, 1) from playhead.

Progress bar scaleX every tick via ref. Chapter React state only when index changes.

Capture helper: window.__msScrollNarrative = { setProgress, getProgress, getTarget, productId: "MS-HERO-STIL01" }. Root data-still-drive="psave".

TECHNICAL (you the AI implement this; the human may not be a developer):

Prefer React + TypeScript + Tailwind with one drop-in component (StillMindfulnessHero). If a files pack is available, prefer integrating source/StillMindfulnessHero.tsx over rewriting.

Video attributes: muted, playsInline, preload auto, object-fit cover, aria-hidden. No loop as primary mode.

Fonts: load Cormorant Garamond + Inter with display swap. Prefer CSS variables --font-still-display and --font-still-body with system fallbacks.

Do NOT install gsap.

Focus rings mint. Semantic section, header, nav, h1. Safe side padding so type never kisses the frame edge.

Replacement films MUST be re-encoded GOP 3, no B-frames, crf 16 (ffmpeg -g 3 -keyint_min 3 -bf 0). A long-GOP file stalls mid-reverse.

QUALITY BAR:

It should feel like a Forbes-class mindfulness product homepage - quiet, inevitable, expensive. One clear system: dual process PSAVE plus No Scroller. Never jump a frame. Never restore hybrid idle. Never burn storefront UI into the rebuild. Never reduce to wallpaper-only loop.

When done: I should see the full Still experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

 Replacement films MUST be re-encoded GOP 3, no B-frames, crf 16 (ffmpeg -g 3 -keyint_min 3 -bf 0). A long-GOP file stalls mid-reverse.

QUALITY BAR:

It should feel like a Forbes-class mindfulness product homepage - quiet, inevitable, expensive. One clear system: dual process PSAVE plus No Scroller. Never jump a frame. Never restore hybrid idle. Never burn storefront UI into the rebuild. Never reduce to wallpaper-only loop.

When done: I should see the full Still experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Codex / ChatGPT

Select everything in the box area below (all parts if more than one page). Copy, then paste into Codex / ChatGPT. You do not need to understand the technical lines. Your AI does.

You are Codex / ChatGPT acting as my coding agent. Build a complete, production-ready web section or page. Create clear files, install what you need, and leave me a working result. Explain briefly what you built in plain language when finished.

Build a premium full-viewport website hero for a mindfulness and mental wellness brand called STILL.

BACKGROUND VIDEO (required):

Use this video as the full-screen film under the hero (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/still-cosmos-v1.mp4>

If the buyer has a local files pack, use `assets/still-cosmos-v1.mp4` placed at `public/assets/videos/still-cosmos-v1.mp4` (or the path already set in source).

Poster still (while loading / reduced motion still): `public/assets/posters/still-cosmos-v1.webp` (or

<https://www.ClickMotion.dev/assets/posters/still-cosmos-v1.webp>).

The video must be silent. Dual process: PSAVE (Perfect Scroll Video Engine) plus No Scroller (pin-until-complete). NOT wallpaper-only.

NOT hybrid idle free-play. NOT a tall 960vh sticky track.

PSAVE + NO SCROLLER (non-negotiable):

One pinned 100dvh stage in normal document flow. The page does NOT physically scroll during the journey. Do not use position sticky.

Do not build a 960vh spacer. Do not overflow-hidden the host page.

VIRTUAL_VIEWPORTS = 12 (locked: 30s even cosmos; two flicks on 3.6 dump dest). PSAVE_RATE = 1.2. PSAVE_FRAME = 1/24.

PSAVE_REV_STRIDE = 3. PSAVE_LIVE_MS = 280. PSAVE_COAST_SEC = 0.55. PSAVE_EASE_SEC = 0.55.

PSAVE_FLIP_DEADZONE_PX = 32.

Scroll aims a destination 0-1 on the 12 viewport track (raw 1:1, no wheel gain). The film PLAYS to that destination. Never seek currentTime across a jump.

DOWN: muted native play() at playbackRate 1.2. After they lift, leftover dest plus a 0.55s dest floor keeps the film going a little, then rate eases toward about 0.42. Friction, then a graceful stop. Ignore tiny opposite trackpad ticks under 32px.

UP: first real up-scroll snaps dest onto the picture. Walk currentTime backward exactly one 3-frame step (0.125s) per seek. Wait seeked. Never seek to the stop point.

Copy, five chapters, whispers, and the mint bar follow the PICTURE (currentTime / duration), not the wheel target.

Release the pin only when the picture arrives at 0 (up) or 1 (down). Then the host page may continue.

Opening: kick-seek 0.04 to 0, wait seeked, fade the film in.

prefers-reduced-motion: still frame at t=0 + chapter 1 only. No PSAVE.

Do NOT install gsap. Do NOT import ScrollTrigger. Do NOT restore STILL_IDLE_MS, TRACK_VH, a mode chip, or hybrid Option A.

LOOK AND FEEL:

Canvas deep night #070b12. Moon cream type #eef6f4. One mint accent #8fd0c8. Sparing soft violet #c5b8e0 on the progress gradient end only.

Display headlines: Cormorant Garamond or Playfair Display, medium weight, tracking about -0.02em, line-height about 0.94, size clamp roughly 2.6rem to 5.75rem.

Body and UI: Inter 300-500, 15-16px, cream about 72 percent opacity.

Quiet mindfulness prestige. Calm and Headspace craft language with cosmic prestige film. Not clinical white spa, not neon SaaS, not purple mesh, not Meridian estate scrub, not Elyse gold earth, not Revel pearl fashion.

LAYOUT (exact structure):

One pinned 100dvh stage, night canvas under the film. No tall spacer.

Video absolute cover, object-fit cover, under content. No intentional CSS zoom or blur on the film. No center breath circle covering the cosmos.

Dual edge scrim only (left type field + bottom vignette) so type stays legible while the center film stays clean. NEVER grey-wash the entire frame.

Codex / ChatGPT prompt (continued)

Top header: STILL wordmark left; desktop nav Practice, Sleep, Stress, Retreats; right Sign in (glass) + Begin free (mint solid). Mint-to-violet progress hairline under the header (transform scaleX from PLAYHEAD, origin left, driven every tick via DOM ref). NO mode chip. Do not add "Scroll to guide" or "Breathing with you".

Floating whisper words (one per chapter): Breathe in, Unclench, Ease, Expand, Return - soft mint when active.

Bottom content: chapter eyebrow, two-line display H1, body. Right-side chapter markers 01-05 on desktop.

Five chapters mapped to playhead bands 0-0.14, 0.14-0.34, 0.34-0.56, 0.56-0.78, 0.78-1.01:

- 1) Soften. / Begin again. - private practice for a louder world
- 2) When your mind / never lands. - short sessions, no judgment
- 3) Softness / is a skill. - evidence-backed minutes that hold you
- 4) Grow into / your quiet. - daily calm and night rest
- 5) Come home / to yourself. - feeling and benefits: quieter body, clearer mornings, restorative sleep. Dual CTAs Start free session + Explore programs. Three quiet stats: 10 min daily sessions, Science led programs, Live retreats and circles.

Safe horizontal padding at least about 2rem. Hide center nav under 768px. Stack CTAs on small screens.

MOTION (exact):

PSAVE chase on requestAnimationFrame. No GSAP. No ScrollTrigger.

Chapter crossfade about 0.75s cubic-bezier(0.22, 0.61, 0.36, 1) from playhead.

Progress bar scaleX every tick via ref. Chapter React state only when index changes.

Capture helper: window.__msScrollNarrative = { setProgress, getProgress, getTarget, productId: "MS-HERO-STIL01" }. Root data-still-drive="psave".

TECHNICAL (you the AI implement this; the human may not be a developer):

Prefer React + TypeScript + Tailwind with one drop-in component (StillMindfulnessHero). If a files pack is available, prefer integrating source/StillMindfulnessHero.tsx over rewriting.

Video attributes: muted, playsInline, preload auto, object-fit cover, aria-hidden. No loop as primary mode.

Fonts: load Cormorant Garamond + Inter with display swap. Prefer CSS variables --font-still-display and --font-still-body with system fallbacks.

Do NOT install gsap.

Focus rings mint. Semantic section, header, nav, h1. Safe side padding so type never kisses the frame edge.

Replacement films MUST be re-encoded GOP 3, no B-frames, crf 16 (ffmpeg -g 3 -keyint_min 3 -bf 0). A long-GOP file stalls mid-reverse.

QUALITY BAR:

It should feel like a Forbes-class mindfulness product homepage - quiet, inevitable, expensive. One clear system: dual process PSAVE plus No Scroller. Never jump a frame. Never restore hybrid idle. Never burn storefront UI into the rebuild. Never reduce to wallpaper-only loop.

When done: I should see the full Still experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name STILL to [YOUR BRAND NAME] everywhere in the design, including the top left wordmark and any aria labels."

Rewrite the five chapters

Ask your AI: "Rewrite all five chapters (eyebrow, two title lines, body, whisper) for [MY MINDFULNESS BRAND]. Keep five playhead bands and soft non-clinical language. No medical claims. No mode chip."

Change nav and end CTAs

Ask your AI: "Replace nav links Practice, Sleep, Stress, Retreats with [MY FOUR LINKS]. Rename Sign in, Begin free, Start free session, and Explore programs to [MY LABELS]. Keep mint primary and glass secondary pills."

Change stats

Ask your AI: "Change the three end stats 10 min daily sessions, Science led programs, Live retreats and circles to [A], [B], [C]. Keep three max and only show them in the final chapter."

Change colors

Ask your AI: "Keep a deep-night mindfulness look. Change canvas #070b12, cream #eef6f4, and mint #8fd0c8 to [CANVAS], [CREAM], [ACCENT]. Keep readable cream-on-night contrast. No neon primary system."

Use a different background video

Ask your AI: "Replace the hero film with [YOUR VIDEO LINK OR FILE NAME]. Re-encode GOP 3, no B-frames, crf 16 first. Update the poster still. Keep PSAVE: 12 viewport aim, 1.2x forward, reverse every 3rd frame, leftover dest plus 0.55s dest floor, type-legibility edge scrim. Never wallpaper-only. Never hybrid idle."

Change fonts

Ask your AI: "Load my display serif as --font-still-display and my UI sans as --font-still-body. Keep large two-line chapter titles and quiet body scale."

Make it work on phones

Ask your AI: "Improve the mobile layout so headlines never clip, center nav links hide under 768px, CTAs stack cleanly, safe padding stays at least 2rem, and the stage stays one pinned viewport. Dual process must still hold: page does not physically scroll during the journey."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep dual process PSAVE plus No Scroller (12 vh aim, 1.2x forward, reverse every 3rd frame, leftover dest plus 0.55s dest floor), the STILL night/mint craft, and full film duration. Do not restore gsap, a 960vh sticky track, or 5s idle free-play. Do not reduce to wallpaper-only. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic ultra-premium 4K continuous journey, 24 to 40 seconds, 24fps, silent. ARC: (1) arid desert under vast starfield and giant planets; (2) soft greening - moss, ferns, living path; (3) lush cosmic valley, deep emerald ground, teal-cyan planets, hopeful night sky. Optional single distant figure in pale fabric, back to camera - no faces as product, no brands. CAMERA: slow elevated glide or gentle push, contemplative prestige pace. EVEN time, not a late kick. LOOK: deep night voids, mint-teal planet glow, cream moonlight edges, gentle film grain. Calm app cinema meets high-end nature documentary. Not neon cyberpunk, not corporate office meditation stock. FORBIDDEN: logos, UI, captions, watermarks, overcrowded tourist scenes, harsh teal-orange blockbuster grade, jump cuts. TECH: 16:9, 3840x2160 preferred or 1920x1080 min, silent. After export RE-ENCODE GOP 3 no B-frames: ffmpeg -y -i your-film.mp4 -an -c:v libx264 -pix_fmt yuv420p -preset slow -crf 16 -g 3 -keyint_min 3 -bf 0 -sc_threshold 0 -movflags +faststart still-cosmos-v1.mp4. Save as public/assets/videos/still-cosmos-v1.mp4, poster to public/assets/posters/still-cosmos-v1.webp. Keep PSAVE (12 vh aim, 1.2x forward, reverse every 3rd frame, leftover dest plus 0.55s dest floor). Never wallpaper-only. Never hybrid idle.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Still layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
