

YOUR PRODUCT PACKAGE

TerraNova

Clean Energy Platform Hero

A deep-forest clean energy homepage with aerial renewable landscape film, Fraunces type, and sage glass. Optimistic climate-tech energy, ready to build with your favorite AI coding tool.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/terra-aerial-v1.mp4>

Offline file name if you were given a file: terra-aerial-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the TerraNova design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/terra-aerial-v1.mp4>

File name: terra-aerial-v1.mp4

What the film shows: aerial wind farm / renewable ridge landscape, living greens and soft solar gold light, slow cinematic glide. About 60 seconds, seamless loop feel, no sound.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file terra-aerial-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium full-viewport website hero for a clean energy platform brand called TERRA NOVA.

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/terra-aerial-v1.mp4>

If the user has a local file named terra-aerial-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Play it as a looping cinematic wallpaper (autoplay, muted, loop, playsInline). Do NOT use scroll-scrub timeline control.

Optional light parallax scale on desktop only (about 1.0 to 1.05). Pause when the hero is off-screen.

LOOK AND FEEL:

Deep forest canvas #0B1A14. Cream headlines #F4F7F2. Living sage #7BA58F and soft solar gold #E8B86D as the only accents.

Display: Fraunces (or similar soft editorial serif) for big titles. Body: DM Sans or Inter light.

Soft green-tinted liquid-glass navigation and secondary buttons. Primary CTAs are sage pills with forest text.

Left-heavy dual forest scrims so type stays readable over the aerial renewable landscape film.

Optimistic climate-tech prestige. Never cyan-pink neon kits, purple mesh, shiny rainbow text, emoji, cream wellness spa (Aether), amber film-lot espresso (Lumina), multi-chapter scroll scrub (Meridian), or brutalist zero-radius monochrome (Vertex).

LAYOUT:

Single full-viewport hero (not multi-chapter scroll scrub). Fixed soft-glass navbar on top.

Top left: brand TERRA NOVA with a small living sage glowing dot. Center links (hide on small phones): Solutions, Impact, Technology, About, Contact. Right: two pills "Our Impact" (glass) and "Talk to Us" (sage fill, forest text).

Hero content left-aligned over the film:

- Badge: CLEAN ENERGY PLATFORM (uppercase, tracking wide, sage)

- H1: POWER THE (huge cream Fraunces)

- Lockup line: PLANET. (solar gold)

- Short body about utility-scale renewables and intelligent grids

- Two CTAs: Explore Solutions (sage fill) and See the Impact (glass outline)

Safe side padding so type never clips. No glitch effects. Soft staggered entrances only.

TECHNICAL (you the AI implement this, the human may not be a developer):

Use a modern web stack that works in the tool I am using. Prefer one main page section component. Video: muted, playsInline, autoPlay, loop, preload metadata, object-fit cover. IntersectionObserver to pause when off-screen. Framer Motion (or equivalent) for staggered entrance. Optional GSAP ScrollTrigger for light video scale parallax on desktop only. Support prefers-reduced-motion: no parallax, simple fade-in. Keep text readable with left-heavy forest gradients over the video.

QUALITY BAR:

It should feel like a serious climate-tech launch page, not a generic AI green template. One clear system: looping aerial film + soft type + sage craft accent.

When done: I should see the full TerraNova experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium full-viewport website hero for a clean energy platform brand called TERRA NOVA.

BACKGROUND VIDEO (required):

Use this video as the full-screen background film (not a small thumbnail):

<https://www.ClickMotion.dev/assets/videos/terra-aerial-v1.mp4>

If the user has a local file named terra-aerial-v1.mp4, use that file path in the project instead of downloading.

The video is silent. Play it as a looping cinematic wallpaper (autoplay, muted, loop, playsInline). Do NOT use scroll-scrub timeline control.

Optional light parallax scale on desktop only (about 1.0 to 1.05). Pause when the hero is off-screen.

LOOK AND FEEL:

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Change the brand name

Ask your AI: "Change the brand name TERRA NOVA to [YOUR BRAND NAME] everywhere in the design, including the top left."

Change the big headlines

Ask your AI: "Change POWER THE to [LINE 1] and PLANET. to [LINE 2]. Keep huge Fraunces and cream/solar-gold split."

Change badge and body

Ask your AI: "Change the badge CLEAN ENERGY PLATFORM and the body paragraph to [YOUR COPY]. Keep left-aligned editorial stack."

Change button labels

Ask your AI: "Rename Explore Solutions to [PRIMARY] and See the Impact to [SECONDARY]. Keep sage primary and glass secondary pills."

Change colors

Ask your AI: "Swap sage #7BA58F and solar gold #E8B86D to [ACCENT A] and [ACCENT B]. Keep deep forest canvas and readable contrast."

Use a different background video

Ask your AI: "Replace the background video with [YOUR VIDEO LINK OR FILE NAME]. Keep muted loop autoplay, not scroll scrub."

Make it work on phones

Ask your AI: "Improve the mobile layout so the headline never clips, nav center links hide, CTAs stack cleanly, and parallax is off under 768px."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE WHAT YOU SEE]. Fix it and keep the Terra Nova forest/sage climate-tech style. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Cinematic 4K seamless loop feel, silent, 24 frames per second. Aerial renewable landscape - wind ridges or solar fields, slow glide, living sage and soft solar gold grade, deep forest voids. No people, no faces, no readable text, no logos, no neon cyberpunk city. Optimistic climate-tech trailer look. Seamless loop.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same TerraNova layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
