

YOUR PRODUCT PACKAGE

Dopamine

Complete Fashion Footer Section

Close every fashion page with authority: dual nav, exclusion wordmark, living figure, Lottie badge, letter scramble, and a couture subscribe form.

WHAT IS INSIDE

- Your background video link (and how to use the file)
- A ready prompt for Cursor, Claude, Grok Build, Lovable, Codex, Bolt or any smart AI
- Simple ways to ask your AI to customize text, colors, and the video look

You do not need to know how to program. Your AI does the technical work.

www.ClickMotion.dev

Start here (about 10 minutes)

Follow these steps in order. If you get stuck, paste the error message into the same AI and ask it to fix the project for you.

Step 1

Save your background video somewhere easy to find. You can use the link below or the video file that came with this package.

Step 2

Open the AI tool you already use.

Step 3

Find that tool's section in this PDF (or "Your Smart AI Agent" if your tool is not listed by name). Select the whole prompt under "Copy this into [tool]". Copy it.

Step 4

Paste it into a new chat or project in that tool and run it. Let the AI build everything.

Step 5

When the preview looks absolutely stunning, ask your AI: "Explain in plain language how I open and share this site."

Step 6

To change wording, colors, or branding, use the "Ask your AI to change..." lines later in this PDF. You do not edit code by hand unless you want to.

YOUR BACKGROUND VIDEO LINK

<https://www.ClickMotion.dev/assets/videos/dopamine-footer-preview-v1.mp4>

Offline file name if you were given a file: dopamine-footer-preview-v1.mp4. A still image may be included next to your video file for a clean first frame.

Your background video

This is the film that plays behind the Dopamine design. Keep this link. It is also written inside every AI prompt below so your AI can attach it automatically.

VIDEO URL

<https://www.ClickMotion.dev/assets/videos/dopamine-footer-preview-v1.mp4>

File name: dopamine-footer-preview-v1.mp4

Client media is figure + mask webps + Lottie in the files zip under assets/ (not a background film product).

Storefront presentation shows the full footer enter (page + fullscreen previews). Rebuild only from pack source + assets.

Prefer the URL when online. If you were given a local download, tell your AI: "Use my local file dopamine-footer-preview-v1.mp4 as the full-screen background video."

Copy this into Cursor

Select everything in the box area below (all parts if more than one page). Copy, then paste into Cursor. You do not need to understand the technical lines. Your AI does.

You are building production UI in my coding editor (Cursor). Create the files I need and keep the solution clean and complete.

Build a premium website FOOTER section (not a hero) called DOPAMINE - a complete fashion close.

This is a FULL FOOTER SYSTEM. Dark couture stage with CSS-masked backgrounds, an absolute hero figure, a Lottie discount badge, dual mono navigation with letter scramble on enter, an exclusion-blend wordmark, a subscribe title + email form (client validation only), and a legal bottom row with a credits panel. No external hyperlinks unless the buyer asks.

CLIENT MEDIA (required - in the product files zip):

Place under public/assets/dopamine/:

Woman1.png, footer_bg_mob.webp, footer_bg_tablet.webp, footer_bg_desk.webp, footer_bg_desk-scaled.webp,

FOOTER_LOTTIE_v1.json

Paths in SiteFooter.tsx already match /assets/dopamine/...

Storefront preview videos on ClickMotion are presentation only - never use them as rebuild media.

LOOK AND FEEL:

Dark stage, cream-adjacent fashion energy, heavy geometric wordmark with mix-blend exclusion over the figure, IBM Plex Mono (or equal) for legal/nav, Inter for UI. Red accent #ed3833 sparingly. Quiet luxury, not SaaS glass.

MOTION (non-negotiable):

ScrollTrigger once when footer top hits 80% of viewport:

- Logo yPercent 300 to 0 (1.2s power3.out)
 - Figure yPercent 100 to 0 (1.2s)
 - Form opacity 0 to 1 (2s)
 - Title scaleY 0 to 1 from bottom (0.8s @ 0.4)
 - Letter scramble on nav + bottom data-split text
 - Lottie badge enter; desktop hover advances frame range
 - prefers-reduced-motion: reduce -> settled readable footer (no entrance thrash / scramble)
- Prefer integrating pack source SiteFooter.tsx, scramble.ts, DopamineLogo.tsx, dopamine-footer.css.

LAYOUT LAW:

Use class dop-container for padding - NEVER Tailwind .container (max-width breaks the design).

Desktop: dual nav, full-width logo, title left + form right, bottom legal grid.

Figure height-driven (desktop about 65rem). Mask backgrounds swap by breakpoint.

TECHNICAL:

React + TypeScript. gsap + ScrollTrigger. lottie-web canvas. Import dopamine-footer.css once.

Single export SiteFooter (named export).

CUSTOMIZATION LAW:

Every nav label, wordmark string, figure, Lottie, credit line, and accent is replaceable.

After default builds, restage for buyer brand.

QUALITY BAR:

The last screen of the site must feel like a campaign end-card - expensive, complete, alive on scroll.

REFERENCE MOTION (storefront presentation - do NOT use as rebuild media):

<https://www.ClickMotion.dev/assets/videos/dopamine-footer-preview-v1.mp4>

Cursor prompt (continued)

When done: I should see the full Dopamine experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Copy this into Claude

Select everything in the box area below (all parts if more than one page). Copy, then paste into Claude. You do not need to understand the technical lines. Your AI does.

You are my coding assistant. Build a complete, production-ready solution I can use. Explain briefly what you created after you finish, in plain language.

Build a premium website FOOTER section (not a hero) called DOPAMINE - a complete fashion close.

This is a FULL FOOTER SYSTEM. Dark couture stage with CSS-masked backgrounds, an absolute hero figure, a Lottie discount badge, dual mono navigation with letter scramble on enter, an exclusion-blend wordmark, a subscribe title + email form (client validation only), and a legal bottom row with a credits panel. No external hyperlinks unless the buyer asks.

CLIENT MEDIA (required - in the product files zip):

Your Smart AI Agent prompt (continued)

REFERENCE MOTION (storefront presentation - do NOT use as rebuild media):
<https://www.ClickMotion.dev/assets/videos/dopamine-footer-preview-v1.mp4>

When done: I should see the full Dopamine experience with the background video linked above and every layout requirement above. If something is missing, fix it without asking me for code knowledge.

Customize without coding

You never have to open code. After the site is built, start a new message to the same AI and paste one of these lines. Fill in the brackets with your words.

Rebrand the wordmark

Ask your AI: "Change DOPAMINE in DopamineLogo and copyright to [YOUR BRAND]. Keep exclusion blend and full-width logo."

Swap the figure

Ask your AI: "Replace Woman1.png under public/assets/dopamine/ with my PNG. Keep height-driven desktop scale. Nudge left/bottom only if needed."

Change navigation

Ask your AI: "Update SHOP_NAV and LEGAL_NAV to [MY LABELS]. Keep scramble. Do not add external links unless I ask."

Subscribe copy

Ask your AI: "Change Subscribe (latest news) to [HEADLINE] and the button to [CTA]. Keep client-only validation."

Lottie badge

Ask your AI: "Replace FOOTER_LOTTIE_v1.json with my file at the same path, or hide .footer__discount if I do not want a badge."

Something looks wrong

Ask your AI: "Something is broken: [DESCRIBE]. Keep Dopamine footer motion (logo rise, figure enter, scramble, Lottie). Use dop-container not Tailwind container. Do not ask me to write code."

New background video (optional)

Only if you want a different film. Open a video generation AI, paste the prompt below, generate a silent clip about 12 seconds long, then ask your coding AI to use your new file as the background.

COPY THIS INTO A VIDEO AI

Optional new figure: transparent fashion PNG, full body or 3/4, clean edges, no UI chrome. Optional new Lottie badge matching brand. Or replace with buyer assets as provided.

Then tell your coding AI

Ask your AI: "Use my new video file [FILE NAME OR LINK] as the full-screen background. Keep the same Dopamine layout and behavior."

You are ready

- Your video link is on the video page of this package and inside every tool prompt.
- Pick one AI tool (or Your Smart AI Agent), paste that full prompt, and let it build.
- Customize by asking your AI in plain English. You do not need to know React or other frameworks.
- Brand site: www.ClickMotion.dev

ClickMotion

www.ClickMotion.dev

If something fails, paste the error into your AI and say: "Fix this for me without asking me to write code."
